QUESTION 1

Refer to the exhibit.

An administrator configures a lease policy, ("1 Day Lease"), for the App-Dev project so that machines have a starting lease of one day and a maximum lease of five days.

The following week, the administrator is assigned a ticket to address an issue with machines being deleted without any notifications being received. The administrator requests a new machine deployment through the App-Dev project\\'s service catalog. Given the one day lease period, the administrator expects to receive an automated "Lease Expiring" system immediately following a successful deployment; however, the email is not received. The administrator checks the deployment that has just been created (as displayed in the exhibit) and confirms that the "1 Day Lease" policy has been correctly applied.

Which action should the administrator take to resolve this issue?

A. Ensure the users have notifications enabled.

B. Run the Configure mail workflow.

C. Configure the notification email Server.

D. Add an email endpoint.

Correct Answer: C

QUESTION 2

Assuming no additional inputs have been added to the blueprint and the custom form is not enabled, which two fields are always flagged as mandatory when requesting a catalog item? (Choose two.)

A. Deployment name

B. Description

C. Version

D. Cloud zone

E. Project

Correct Answer: CE

QUESTION 3

What is the main difference between vRealize Orchestrator non-persistent logs and persistent logs?

A. Log Insight forwarding configuration

B. Storing of events in the database

C. Time Synchronization of logs

D. Logging level configuration

Correct Answer: B
