- A. IBM Cloud
- B. Oracle Cloud
- C. Amazon Web Services
- D. Alibaba Cloud
- E. Microsoft Azure

Correct Answer: CE

QUESTION 3

Kubernetes zones enable administrators to define the policy-based placement of which items? (Choose the best answer.)

- A. Pods and deployments
- B. Ingress and load balancing
- C. Clusters and namespaces
- D. Service accounts and role-based access control (RBAC)

Correct Answer: C

QUESTION 4

An administrator wants to simplify the cloud configuration as much as possible. Recently the administrator was asked to simplify the cloud template creation and requesting process. The goal is to create a single cloud template that can be deployed to different cloud accounts available in the environment. Depending on the cloud, the appropriate template should be used.

Which vRealize Automation construct can the administrator use to achieve this goal?

- A. Image Mappings
- B. Storage Profiles
- C. Flavor Mappings
- D. Customization Specifications

Correct Answer: D

QUESTION 5

For which two components can an administrator add a machine template using image mappings? (Choose two.)

- A. Microsoft Azure
- B. VMware Enterprise PKS
- C. vRealize Operations
- D. NSX-T Data Center
- E. vCenter Server

Correct Answer: AE
