QUESTION 1

The administrator is tasked with creating a number of different content sources in Service Broker so that multiple types of catalog items can be created.

What is the only public cloud template that can be selected as a content source in Service Broker? (Choose the best answer.)

- A. Google Cloud Deployment Manager templates
- B. Alibaba Cloud Resource Orchestration Service templates
- C. AWS CloudFormation templates
- D. Azure Resource Manager (ARM) templates

Correct Answer: C

QUESTION 2

After collecting a log bundle using the vracli CLI command, the resulting .tar file contains many paths and files.

Where will the administrator find the logs related specifically to the embedded vRealize Orchestrator?

- A. /pods/prelude/extensibility-ui-app-
- B. /pods/prelude/vco-app-
- C. //var/log/vco
- D. /pods/kube-system/

Correct Answer: B

QUESTION 3

An administrator will use the vRealize Automation Code Stream Smart Templates to trigger pipeline testing when there are code changes in GitHub.

Which template should the administrator use? (Choose the best answer.)

- A. Continuous Delivery
- B. Cloud Template
- C. Blank Canvas

D. Continuous Integration

Correct Answer: D

QUESTION 4

An IT Director wants to integrate existing Amazon Web Services CloudFormation templates into a new vRealize Automation deployment.

How can the administrator achieve this? (Choose the best answer.)

- A. Deploy a Cloud Proxy into the appropriate region of the pre-configured Amazon Web Services cloud account.
- B. Add content sources in Service Broker from the pre-configured Amazon Web Services cloud account.
- C. Create and configure a custom integration into Cloud Assembly.
- D. Leverage Action Based Extensibility (ABX) to extend functionality, programmatically.

Correct Answer: B

QUESTION 5

An administrator wants to simplify the cloud configuration as much as possible. Recently the administrator was asked to simplify the cloud template creation and requesting process. The goal is to create a single cloud template that can be deployed to different cloud accounts available in the environment. Depending on the cloud, the appropriate template should be used.

Which vRealize Automation construct can the administrator use to achieve this goal?

- A. Image Mappings
- B. Storage Profiles
- C. Flavor Mappings
- D. Customization Specifications

Correct Answer: D
