QUESTION 5

An application was installed into an AppStack using Microsoft Windows 8.1. The administrator knows that this is a very simple application, and that the AppStack is compatible with other versions of Windows.

How can the administrator make the AppStack available under Microsoft Windows 7?

- A. Go to Volumes, AppStacks, select the AppStack and click Update. Provision the new AppStack to the operating system it should be available to.
- B. Go to Volumes, AppStacks, Select the AppStack and click Assign. Then select the virtual machines it should be available to.
- C. Go to Volumes, AppStacks, select the AppStack and click Edit. Then select the operating systems it should be available to.
- D. Go to AppStacks, select the volume and click modify. Enter the operating system it should be available to and click save.

Correct Answer: C
