QUESTION 1

DRAG DROP

Drag and drop the high-level configuration steps for smart card authentication on the left into the correct sequential order on the right.

Select and Place:

Smart Card Authentication Step	Correct Sequence
Obtain the root certificate from the CA	Step 1
Prepare the AD for smart card authentication	Step 2
Configure smart card settings in the VMware Horizon console	Step 3
Add the root certificate to a server's truststore file	Step 4

Correct Answer:

Smart Card Authentication Step		Correct Sequence
	Step 1	Obtain the root certificate from the CA
	Step 2	Add the root certificate to a server's truststore file
	Step 3	Configure smart card settings in the VMware Horizon console
	Step 4	Prepare the AD for smart card authentication

QUESTION 2

What must be implemented on all Connection Servers for logon segment information to be populated in the Horizon Helpdesk Tool?

A. Vdmadmin -1timingProfiler -enable

B. Vdmadmin -A -d dtpool2 -m machine1 -getstatus

C. Blast Secure Gateway

D. Horizon Helpdesk Agent

Correct Answer: A

https://www.carlstalhood.com/vmware-horizon-8-connection-server/#timingprofiler https://docs.vmware.com/en/VMware-Horizon-7/7.13/horizon-administration/GUID-256CFA52-E742-4A3F-8F3E-6DE9CEDE5272.html https://docs.vmware.com/en/VMware-Horizon/2206/horizon-console-administration/GUID-F81C40C4-8D3A-4F23-BCE8-C9F5675183BB.html

QUESTION 3

Having configured two standalone Horizon pods, what steps should be taken to join them in a Cloud Pod Architecture (CPA) deployment?

A. Initialize the CPA on both Pods. On the second pod, sync the CPA. On one pod, create Cloud entitlements, and add local pooh from each pod.

B. Initialize the CPA on both Pods. On the second pod, sync the CPA. On one pod, create Global Entitlements, and add local pools from each pod.

C. On one pod, initialize the CPA. On the second pod, join the CPA. On one pod, create Global Entitlements, and add local pools from each pod.

D. On one pod, initialize the CPA. On the second pod, join the CPA. On one pod, create Cloud Entitlements, and sync pooh from each pod.

Correct Answer: C

CPA creates a global data layer. Global Entitlements are automatically synchronized so there is no need to synchronize pools manually. You initialize CPA at one site, then from the other site join the CPA federation. Next create Global Entitlements and add local pools from each site to the Global Entitlement. You do have to be connected to the Connection Server where the local pools exist in order to add to the Global Entitlement. https://docs.vmware.com/en/VMware-Horizon/2206/horizon-cloud-pod-architecture/GUID-AE1B4398-B275-40C7-AF45-A727E359E5DF.html

QUESTION 4

What is the benefit of using the Browse local Profile feature in the Dynamic Environment Manager to adjust the Import/Export configuration for an application DirectFlex?

A. The Import/Export Config can be deleted from a user profile.

B. The Microsoft Windows users profile configuration can be changed.

C. It allows backup of the user profile.

D. The registry or filesystem paths do not have to be typed in the editor.

Correct Answer: D

https://docs.vmware.com/en/VMware-Dynamic-Environment-Manager/9.8/com.vmware.user.environment.manager-adminguide/GUID-37AE6051-3CDC-40A4-9C38-CFEB1DF89690.html#:~:text=To%20enable%20profile%20browsing%20for,is%20only%20available%20for%20administrators.

QUESTION 5

A company will be deploying hundreds of desktops for temporary workers. The workers be heavy Microsoft 365 users and require access to local USB, camera, and printers. The company is challenged with no spare capacity to support the deployment in their datacenter.

Which VMware solution can the company use to easily deploy the desktops, while keeping the base cost lower than other possible solutions?

A. Horizon on Google Cloud VMware Engine

B. VMware Horizon on Azure

C. VMware Horizon On-premises

D. VMware Horizon on AWS

Correct Answer: B
