QUESTION 1

Which three statements are correct regarding booting an ESXi Host from Fibre Giannel SAN? (Oioose three.)

A. Direct connect topology is supported.

B. Multipathing to a boot LUN on an active-passive array is supported.

C. ESXi hosts do not require local storage.

D. Each host must have its own boot LUN.

E. Hosts can share one common boot LUN.

Correct Answer: ACD

https://docs.vmware.com/en/VMware-vSphere/6.5/com.vmware.vsphere.storage.doc/GUID-8FAD881D7A00-43C9-AB69-66DC7816968C.html When you use boot from SAN with multiple ESXi hosts, each host must have its own boot LUN. If you configure multiple hosts to share the same boot LUN, ESXi image corruption is likely to occur. Multipathing to a boot LUN on active-passive arrays is not supported because the BIOS does not support multipathing and is unable to activate a standby path. The correct answers are:- ABC Direct connect topology is supported.

Each host must have its own boot LUN. ESXi hosts do not require local storage.

QUESTION 2

VMware Converter can import a powered off virtual machine from which two virtual machine platforms? (Choose two.)

A. VMware Workstation

B. Linux with KVM

C. Microsoft Hyper-V

D. Citrix Xen

Correct Answer: AC

QUESTION 3

Which two statements are true regarding Auto Deploy in version 6.5? (Choose two.)

A. Auto Deploy can be configured and managed via PowerCLI.

B. Auto Deploy can be configured and managed via the vSphere Client.

C. Auto Deploy can be configured and managed via the vSphere Web Client.

D. Auto Deploy can be configured and managed via vCLI commands.

Correct Answer: AC

QUESTION 4

An administrator notices that a virtual machine running SQL Server is not performing as expected. Upon

checking the logs, the administrator sees the following error:

vmware.log> vmx| W110: NUMA and VCPU hot add are incompatible. Forcing UMA How can the

administrator resolve this issue?

A. Power off the virtual machine and disable vCPU hot plug.

B. Reinstall VMware Tools.

C. Modify the .vmx file to force NUMA and vCPU hot add to function.

D. Install a third party plug-in to enable NUMA and vCPU hot add to function.

Correct Answer: A

QUESTION 5

In vCenter Server 6.5, which two host states can be configured as remediation steps with Proactive HA? (Choose two.)

A. Maintenance mode

B. Disconnected

C. Powered off

D. Standby mode

E. Quarantine mode

Correct Answer: AE

Proactive HA Failures A Proactive HA failure occurs when a host component fails, which results in a loss of redundancy or a noncatastrophic failure. However, the functional behavior of the VMs residing on the host is not yet affected. For example, if a power supply on the host fails, but other power supplies are available, that is a Proactive HA failure. If a Proactive HA failure occurs, you can automate the remediation action taken in the vSphere Availability section of the vSphere Web Client. The VMs on the affected host can be evacuated to other hosts and the host is either placed in Quarantine mode or Maintenance mode. References:
