Which are the two storage options for a Content Library when using the VMware vCenter Appliance? (Choose two.)

- A. FTP
- B. NFS
- C. CIFS
- D. VMFS

Correct Answer: BD

When you create a local library, you can store its contents on a datastore managed by the vCenter Server instance or on a remote file system. Depending on the type of storage that you have, you can use Virtual Machine File System (VMFS) or Network File System (NFS) for storing content on a datastore.

QUESTION 5

An attempt to delete NFS datastore from an ESXI host returns the error:

Sysinfo error on operation returned the following status: Busy

Which two statements could explain this failure? (Choose two.)

- A. Storage I/O Control is enabled on NFS datastore.
- B. NFS datastore is a part of Storage DRS Cluster.
- C. NFS datastore has running or registered virtual machines.
- D. NFS.VolumeRemountFrequency value is set to 30.

Correct Answer: AC

The busy status indicated that either storage I/O control is enabled on NFS datastore or the NFS datastore is running on registered virtual machines. In both cases, sysinfo error on operation will be returned with busy status.
