

# 300-415<sup>Q&As</sup>

Implementing Cisco SD-WAN Solutions (ENSDWI)

## Pass Cisco 300-415 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.passapply.com/300-415.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Cisco  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

Which secure connection should be used to access the REST APIs through the Cisco vManage web server?

- A. HTTP inspector interface
- B. authenticated HTTPS
- C. authenticated DTLS
- D. JSON Inspector interface

Correct Answer: B

### QUESTION 3

Which feature delivers traffic to the Cisco Umbrella SIG cloud from a Cisco SD-WAN domain?

- A. L2TPv3 tunnel
- B. IPsec tunnel
- C. local umbrella agent
- D. source NAT

Correct Answer: C

---

#### QUESTION 4

If Smart Account Sync is not used, which Cisco SD-WAN component is used to upload an authorized serial number file?

- A. WAN Edge
- B. vManage
- C. vSmart
- D. vBond

Correct Answer: B

[https://sdwan-docs.cisco.com/Product\\_Documentation/vManage\\_Help/Release\\_18.3/Configuration/Devices](https://sdwan-docs.cisco.com/Product_Documentation/vManage_Help/Release_18.3/Configuration/Devices)

---

#### QUESTION 5

In Cisco SD-WAN, what protocol is used for control connections between SD-WAN devices?

- A. BGP
- B. OSPF
- C. DTLS
- D. OMP

Correct Answer: C

In the reference link under the 'Control Plane Authentication' part, you can find the following:

Then, during the automatic authentication process, as pairs of devices (routers and controllers) are establishing DTLS control connections, each device compares the serial numbers (and for routers, the chassis numbers) to those in the files installed on the router.

DTLS is the connection that facilitates the exchange of OMP information between the devices. In vManage the number of control connections also shows the amount of DTLS connections to/from a device. OMP is not the control connection, it's the control plane management protocol.
