QUESTION 5

Cisco USB Director provides many tools to help diagnose and resolve common problems. Which option describes the purpose of the system information tool?

- A. to view basic and advanced system information, including the license status, database tables version, recourse usage, logs, and debugging processes for troubleshooting
- B. to view product support information
- C. to execute JavaScript functions and to define variables and functions, when using cloupia scripts
- D. to troubleshoot problems related to various administrative tasks such as connectivity, configuration, and status

Correct Answer: A

Reference: Basic system information includes the version, uptimes, service status, system license status, usage, compute accounts status, compute server status, storage account status, system catalogs, network device status, and cloud status.

The advanced system information includes basic system information, and database tables summary, product configuration, top process information, and information on processors, memory, disks, log files, network, and login. You can also view the system task status, cloud inventory, and monitoring status.
