QUESTION 1

An engineer is designing a multitenant data center using Cisco validated design practices. The engineer must ensure that traffic is security segregated between tenants at the core layer and aggregation layers.

Which design must be implemented to accomplish this task?

A. VRF-Lite on the core and aggregation layer routing infrastructure

B. strict core and aggravation level QoS traffic shaping

C. strict core and aggregation level QoS policing

D. disparate VLANs across the core and aggregation layer switching infrastructure

Correct Answer: A

QUESTION 2

A UCS Director administrator must migrate a VM from a hypervisor to a pubic cloud. In which two ways can this task be accomplished? (Choose two)

A. You can perform vMotion and Storage VMotion simultaneously on a running VM.

B. VM Migration can occur using the Migrate VM wizard.

C. You can add the Migrate VM task from the Cisco UCS Director task library to a workflow for migration.

D. vMotion or Storage vMotion can be triggered through Virtual > Migration menu.

Correct Answer: AC

QUESTION 3

Which two of the following describe how isolation can be achieved for VMDC data center security? (Choose two.)

A. intrusion prevention appliances that inspect traffic and detect security events on a per-VLAN basis

B. role-based access and authentication

C. virtual routing and forwarding tables

D. proper infrastructure hardening

E. application redundancy

F. policy enforcement and access control

Correct Answer: AC

QUESTION 4

Which statement about thin provisioning is true?

A. The disk is allocated and zeroed on demand as the space is used.

B. The disk has all space allocated at time of creation.

C. The disk has all space allocated and is wiped clean of any previous contents on the physical media at creation time.

D. Before writing to a new block, a zero must be written.

Correct Answer: C

QUESTION 5

A cloud administrator is considering methods for securing the cloud infrastructure. Which three statements about data plane protection are true? (Choose three.)

A. You must preplan security policies and test them thoroughly before you implement them in an automated fashion.

B. Define security policies after the creation of virtual machine environments.

C. Storing sensitive information on the cloud is permissible as long as the data center architecture is resilient.

D. Out-of-date corporate security policies contribute to data exposure.

E. Encrypting data at rest on the disk is extremely helpful in assuring data protection within a cloud-based data center.

F. Data encryption is enforced only when an application requires it.

Correct Answer: ABE
