QUESTION 1

A customer has deployed a new e-commerce application that is hosted in a private cloud. The application is used globally on a 24-hour basis. The customer wants to ensure that user transactions do not negatively affect website performance and wants to prevent loss of service due to traffic load.

Which two actions will harden the web environment? (Choose two.)

- A. Implement a web application firewall
- B. Use antivirus software to protect the application web server
- C. To maintain communication, ensure that the web application is on the same LAN as the other servers
- D. To protect from malicious attacks, avoid a public-facing application
- E. Use a DDoS appliance to protect the application

Correct Answer: AE

QUESTION 2

Drag and drop each storage type on the left onto the correct description on the right.

Select and Place:

TSR Watermark Image - Unregistered version - This line is removed when registered

CIFS	deployed over specialized switches to send SCSI commands and provide a server with block-level access to storage devices over a lossless fabric
NFS	allows a user to view, store, and update files on a remote server; is a client/server protocol developed and used by Microsoft
iSCSI	deployed over TCP/IP to send SCSI commands and provide a server with block-level access to storage devices over a local or wide-area network
FC	encapsulates Fibre Channel frames into native Ethernet networks
FCoE	allows a user to view, store, and update files on a remote server; is a client/server protocol originally developed by Sun Microsystems

Correct Answer:

TSR Watermark Image - Unregistered version - This line is removed when registered

	FC
	CIFS
	iSCSI
	FCoE
	NFS

QUESTION 3

Drag the actions on the left to the order on the right that they must be completed in to design an application stack.

Select and Place:

TSR Watermark Image - Unregistered version - This line is removed when registered

Deploy out-of-box application or import additional application components that can be used in the Stack Designer.	Step 1
Add the application component to Stack Designer.	Step 2
Create application template in Stack Designer using available components.	Step 3
Define parameters for this application component to show it as a Stack Designer resource, including the orchestration types for provisioning the component when ordered in Service Catalog.	Step 4
Track the provisioning progress.	Step 5

Correct Answer:

TSR Watermark Image - Unregistered version - This line is removed when registered

	Deploy out-of-box application or import additional application components that can be used in the Stack Designer.
	Define parameters for this application component to show it as a Stack Designer resource, including the orchestration types for provisioning the component when ordered in Service Catalog.
	Add the application component to Stack Designer.
	Create application template in Stack Designer using available components.
	Track the provisioning progress.

QUESTION 4

A cloud administrator is considering solutions to automate a hybrid cloud deployment. The solution requires a single pane of glass infrastructure management, monitoring, health dashboard, orchestration and self-service port.

Which solution is appropriate for this environment?

- A. Cisco Enablement Platform
- B. Cisco IAC
- C. Cisco UCS Director
- D. Cisco ONE

Correct Answer: D

QUESTION 5

Drag and drop each context-aware component on the left to its corresponding function on the right. (Not all options are used.)
