QUESTION 5

A trusted partner of an organization recently experienced a new campaign that was leveraging JavaScript attachments to trick users into executing malware. As a result, they created a local policy to deny messages with JavaScript attachments. Which action should the administrator of the organization take to ensure encrypted communications are delivered to the intended partner recipient?

A. Insert the X-PostX-Use-Script\\' header with a value of false to the encrypted messages

B. Select JavaScript-free\\' option within the Cisco Secure Email Encryption Service Add-in

C. Create an outgoing content filter and add the Encrypt and Deliver Nov/ action with Use-Script option deselected

D. Create a new encryption profile and deselect the \\'Use-Script\\' envelope settings option

Correct Answer: D
