QUESTION 1

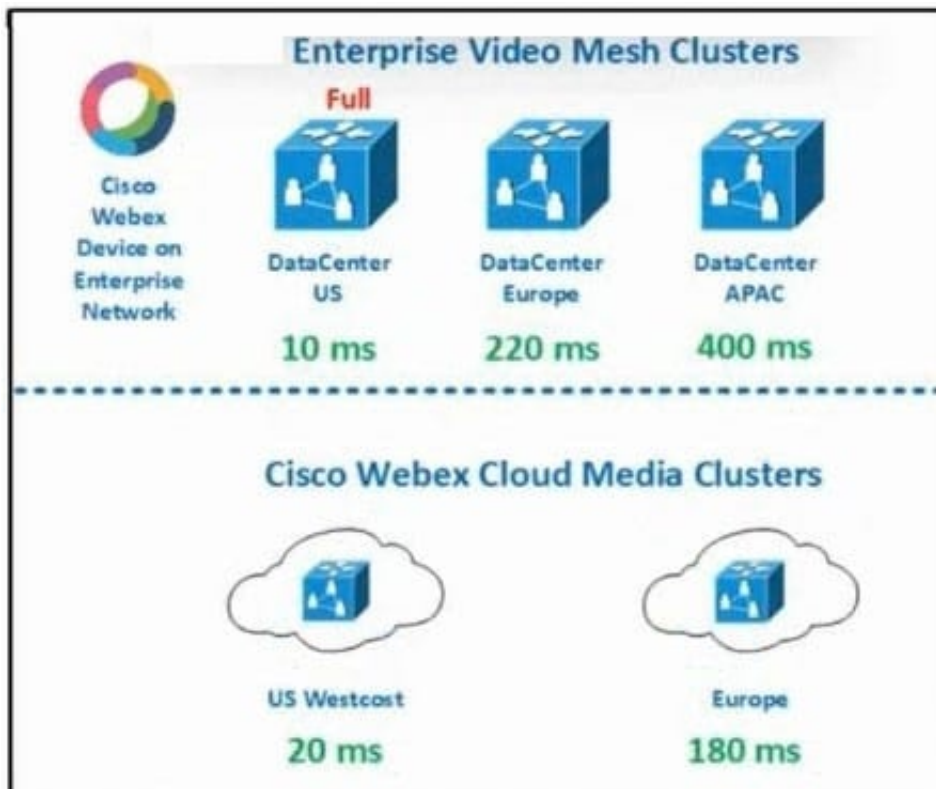

A MRA deployment is being configured where one of the requirements is for registered Jabber users to pull directory photos from an internal server. What should be configured on the Expressway-C so that MRA registered clients reach this server?

- A. A search rule must be created to route the requests to Cisco UCM.
- B. The directory photo server must be added to the HTTP allow list.
- C. A neighbor zone must be created to the directory photo server.
- D. The directory photo server FQDN must be added to the Expressway-C certificate.

Correct Answer: B

QUESTION 2

Refer to the exhibit. A Cisco Webex device on an enterprise network has identified the given STUN round-trip delays in milliseconds to the enterprise Video Mesh clusters and two Webex Cloud Media clusters during the call setup. Which correct sequence of clusters is the client connecting to?

- A. US West Coast WCMC. If US West Cost WCMC is full, then Europe WCMC because clients select clusters in the order of SRT delays.

B. DC Europe. If DC Europe is full, DC APAC because clients select on-premises clusters in the order of SRT delays before using cloud resources,

C. DC Europe. If DC Europe is full, US West Coast WCMC because clients select resources in the order of SRT delays but ignore SRTs greater than 250 ms

D. US West Coast WCMC. Clients continuously monitor DC US cluster and reconnect when DC US are available to save bandwidth.

Correct Answer: C

Local reachable Video Mesh resources are tried first, in order of lowest SRT delay. When all local resources are exhausted, the participant connects to the cloud.

While the preference for node selection is your locally deployed Video Mesh nodes, we support a scenario where, if the STUN round-trip (SRT) delay to an on-premises Video Mesh cluster exceeds the tolerable round-trip delay of 250 ms (which usually happens if the on-premises cluster is configured in a different continent), then the system selects the closest cloud media node in that geography instead of a Video Mesh node. https://www.cisco.com/c/en/us/td/docs/voice_ip_comm/cloudCollaboration/wbxt/videomesh/cmgt_b_webex-video-mesh-deployment-guide/cmgt_b_hybrid-media-deployment-guide_chapter_010.html

QUESTION 3

Which interworking option must be used on the Expressway for it to act as a SIP/H.323 gateway when no endpoint is registered?

A. enabled

B. registered only

C. off

D. on

Correct Answer: D

https://www.cisco.com/c/en/us/td/docs/voice_ip_comm/expressway/admin_guide/X14-0/exwy_b_cisco-expressway-administrator-guide/exwy_m_protocols.html

QUESTION 4

An administrator is configuring a new Cisco Webex Hybrid Message Service deployment, and the Expressway-C Message Connector is successfully registered in the Control Hub. After the server information of the IM and Presence server is

added to the Expressway-C, an error "Connectivity to IM and Presence AXL Service could not be established" is displayed in the Control Hub. The Cisco AXL Web Service is enabled on the IM and Presence Service publisher, and the main

administrator account enabled for AXL API permission is being used.

Which configuration change must be made to resolve this error?

- A. Enable the Cisco AXL Web Service on the Control Hub
- B. Enable the Cisco AXL Web Service on the Expressway-C Message Connector
- C. Enable an End User account for AXL API permissions on the IM and Presence Service publisher
- D. Enable a second administrator account for AXL API permissions on the IM and Presence Service publisher

Correct Answer: D

Configure an account for Message Connector to access the AXL API of the Cisco Unified Communications Manager IM and Presence Service. You must use an independent administrator account, not the main administrator account. https://www.cisco.com/c/en/us/td/docs/voice_ip_comm/cloudCollaboration/spark/hybridServices/messageservice/cmgt_b_spark-hybrid-message-deployment-guide/cmgt_b_spark-hybrid-message-deployment-guide_chapter_010.html upvoted 3 times

QUESTION 5

	Expressway-C	Expressway-E
Name	Enter TraversalZone	Enter TraversalZone
Type		
Username	Enter exampleauth	Enter exampleauth
Password	Enter ex4mp13.c0m	Not applicable
H.323 Mode	On	On
H.323 Protocol	Assent	Assent
H.323 Port	Enter 6001	Enter 6001
H.323 H.460.10 demultiplexing mode	Not applicable	Off
SIP Mode	On	On
SIP Port	Enter 7001	Enter 7001
SIP Transport	TLS	TLS
SIP TLS verify mode	Off	Off
SIP Accept proxied registrations	Allow	Off
Location Peer 1 address	Enter 192.0.2.2	Not applicable

Refer to the exhibit. What are "Type" field values for this Expressway servers zone configuration?

- A. Expressway-C "DNS", Expressway-E "Traversal server"
- B. Expressway-C "Traversal server", Expressway-E "Traversal client"
- C. Expressway-C "Neighbor", Expressway-E "Neighbor"

D. Expressway-C "Traversal client", Expressway-E "Traversal server"

Correct Answer: D
