QUESTION 1

Which actions should be taken in a load balanced cluster in order to protect the load balancer against outages?

- A. Load balancers cannot be protected against outages which is why they should always be built on dedicated hardware.
- B. No actions are necessary as a load balancer cannot become a single point of failure.
- C. Two or more load balancers should be deployed as a cascade that passes packets from one to the other.
- D. Two load balancers should be deployed as a failover cluster.
- E. Load balancers are used for performance and scalability reasons only and cannot be used to archive high availability clusters.

Correct Answer: D

QUESTION 2

Which command in the KVM monitor ejects the first IDE CDROM drive? (Specify the KVM monitor command INCLUDING ALL REQUIRED PARAMETERS.)

- A. eject ide1-cd0 -or- eject -f ide1-cd0

Correct Answer: A

QUESTION 3

Which of the following describes a split brain situation in a high availability cluster?

- A. Several cluster nodes access a shared resource without coordination.
- B. Several cluster nodes run different instances of the same services.
- C. Incoming network connections are accidentally forwarded to more than one backend server.
- D. Instead of shared storage, each node uses local storage managed by itself and replicates with other nodes.
- E. In addition to shared storage, each node has local storage that is not shared with other nodes.

Correct Answer: A

QUESTION 4

In the command `vzctl ____ 105 /usr/bin/apt-get install wget` Which subcommand of `vzctl` is missing in order to install `wget` in the OpenVZ container 105?
