QUESTION 1

Which two statements describe the purpose of a System Manager (SMGR) role? (Choose two.)

- A. It provides access to any number of resources managed by SMGR.
- B. It impacts the originating and terminating applications that can be sequenced for a user.
- C. It is automatically held by users that have been added to any group containing that role.
- D. It can be held by multiple administrators at the same time and a single administrator can have multiple roles enabling tight control of access.

Correct Answer: AD

QUESTION 2

A known and trusted SIP Entity is anticipated to deliver a higher than normal number of SIP messages to session Manager. Two techniques can be applied to prevent the SIP Firewall dropping or blocking from this trusted SIP Entity. Which techniques will prevent the SIP Firewall dropping or blocking packets from this trusted SIP Entity? (Choose two.)

- A. Configure the SIP Entity to point to Session Manager's Eth3 NIC.
- B. Configure the SIP Firewall Fast Track group to include the SIP Entity.
- C. Add details of the SIP Entity to the White List.
- D. Increase the Threshold packet count for the SIP Entity.

Correct Answer: CD

QUESTION 3

Which three statements about a user's profile are correct? (Choose three.)

- A. Branch Session Manager (BSM) association is set in the Session Manager Profile under the user's Communication Profile. If a primary Session Manager has been selected then assigning a BSM mandatory.
- B. Using the Endpoint Profile a user can be assigned a station on a Communication Manager that SMGR knows about.
- C. The difference between the 'SMGR Login Password' and the 'Shared Communication Profile Password' is that one allows the user to login to the SMGR web interface and the other allows them to authenticate at a device.
- D. A user may be assigned exactly one role. That single role can allow access to multiple resource types.
- E. User identity authentication (password checking) can be achieved by first configuring SMGR to communicate with an LDAP server and then choosing the profile 'Authentication Type' as 'Enterprise'.

Correct Answer: BCE

QUESTION 4

What is validated when the Transport Layer Security (TLS) handshake and mutual TLS authentication is performed between the SIP entity and Session Manager?

- A. entity link
- B. entity name
- C. domain
- D. certificate

Correct Answer: D

QUESTION 5

What is the benefit of using the Communication Profile Editor to modify users?

- A. It allows an administrator to change some values of a User Profile for multiple SIP users at one time.
- B. It allows an administrator to change the values of the Session Manager Profile settings for only a single SIP System Manager user at one time.
- C. It allows an administrator to change some values of the Communication Profile settings for multiple SIP System Manager Users at one time.
- D. It allows an administrator to change all values of a User Profile for multiple users at one time.

Correct Answer: B
