**QUESTION 1**

The screenshot shows the Cisco Unified Communications Manager (CUCM) user creation interface. The 'Identity' tab is active, displaying fields for Last Name, First Name, Middle Name, Description, Login Name, Authentication Type (Basic), Password, and Confirm Password. The 'Communication Profile' tab is also visible, showing fields for Communication Profile Password and Confirm Password. Red boxes highlight the Password and Confirm Password fields in the Identity tab, and the Communication Profile Password and Confirm Password fields in the Communication Profile tab.

When creating a New User Profile, an administrator is asked to enter two separate passwords for the new user. Which statement best describes the need for two different passwords?

- A. The Identity password is used in authenticating the user when accessing the user's management console, while the Communication Profile is used to authenticate the user when logging in on a telephone.
- B. The Communication Profile is the prime password for authenticating the user while the Identity password is a backup password used to reset the Communication Profile in cases where the prime password is forgotten.
- C. The Identity password is used when logging in to a telephone that connected to the corporate network while the Communication Profile is used while logging in with a VPN telephone or the corporate network.
- D. The Identity password is used when logging into a telephone in to a communication profile password enables further privileges and capability.

Correct Answer: A

---

**QUESTION 2**

A technician is tasked with creating a set of Routing Policies for the organization. Which statement describes the steps that must be taken prior to defining a new Routing Policy?

- A. A SIP entity must be specified as both a destination and as an origination point. You must provide the times of day that the policy applies, and a dial pattern or regular expression that the call URI must match.
- B. The destination SIP entity can either be chosen specifically, or it may be selected implicitly using a matching expression. Multiple times of day the policy is active can be chosen. The policy must have either a dial pattern or regular expression.

C. A dial pattern must be specified which the called party in the SIP message is matched against. Inclusion of a time range, or regular expression, is optional but recommended since it makes the policy more specific.

D. A SIP Entity must be specified as a destination.

Correct Answer: C

---

### QUESTION 3

A Configuration Manager instance has been set up by an inexperienced administrator. A SIP entity in the network is failing on a regular basis and Session Manager sometimes does not detect the failure for up to 30minutes. Which two Session Manager Configuration fields could have been set incorrectly? (Choose two)

A. Proactive cycle time.

B. Reactive cycle time.

C. Timer period

D. Override port and transport with DNS SRV

Correct Answer: AD

---

### QUESTION 4

The Data Replication Service replicates data from the master database to local copies of the database on each Session Manager instance. It is important that the master and local database are synchronized. How would an administrator check that the databases are synchronized?

A. Run initDRS

B. View the Session Manager Security Module status.

C. Execute the '\\Test Postgres database sanity\\' maintenance test

D. Check the status of the Replica Group

Correct Answer: C

---

### QUESTION 5

What is the outcome of running SMnetsetup on a server that has an existing installation of session manager 601?

A. The network and date/time is configured on the server.

B. A System Manager System administrator login will be created.

C. The same version of the Session Manager software currently Installed is re-installed?

D. The current version of the Session Manager software is upgraded.

Correct Answer: A
