QUESTION 1

Avaya products ensure that authentication credentials and file transfers are protected when sent across the network by using which three methods? (Choose three)

- A. Telnet
- B. HTTPS
- C. Secure Shell (SSH)
- D. Secure Copy (SCP)
- E. HTTP

Correct Answer: BCD

QUESTION 2

A Configuration Manager instance has been set up by an inexperienced administrator. A SIP entity in the network is failing on a regular basis and Session Manager sometimes does not detect the failure for up to 30minutes. Which two Session Manager Configuration fields could have been set incorrectly? (Choose two)

- A. Proactive cycle time.
- B. Reactive cycle time.
- C. Timer period
- D. Override port and transport with DNS SRV

Correct Answer: AD

QUESTION 3

Which statement expresses the relationship between users, roles, and groups?

- A. Roles grant permissions. Users are not directly assigned roles but inherit them through belonging to groups.
- B. A group is a name for a collection of roles and each role is assigned its own administrator user.
- C. Users can belong to groups for easy management and can be assigned roles which grant them access rights.
- D. Groups and roles directly correspond to sections of the SMGR Web Console navigation pane and, unless a user belongs to a specific role group, they cannot access the corresponding management screens.

Correct Answer: C

QUESTION 4

A System Manager (SMGR) product administrator needs to perform some routine maintenance on an Avaya product in their network. Although they can successfully log in to SMGR, they do not have access to the menu they require in the navigation panel. Which action must be taken?

- A. Make sure that the administrator has been assigned to a suitable group.
- B. Make sure that the administrator is not logged in at a different browser.
- C. Ensure that the administrator's authentication type is set to 'enterprise' so that SMGR can retrieve permissions from the active directory server.
- D. Check that the administrator has been assigned an appropriate role.

Correct Answer: D

QUESTION 5

During a post-installation check of System Manager and Session Manager you discover that the Session layer replica node is stuck at "Synchronizing". You run the initTM command in Session Manager but the replication status does not change. Which step will be effective in resolving the problem?

- A. Reset the enrollment password.
- B. Run traceSM to monitor the synchronization events and restart the Security Module.
- C. Delete the Session Manager Replica node in System Manager, verify the enrollment password is valid In System Manager and run the initTM command again in Session Manager.
- D. Verify the enrollment password is valid in System Manager and run the initTM command again in Session Manager.

Correct Answer: D
