QUESTION 1

A company's security states that all web browsers must automatically delete their HTTP browser cookies upon terminating. What sort of security breach is this policy attempting to mitigate?

- A. Attempts by attackers to determine the user's Web browser usage patterns, including when sites were visited and for how long.
- B. Attempts by attackers to access passwords stored on the user's computer without the user's knowledge.
- C. Attempts by attackers to access Web sites that trust the Web browser user by stealing the user's authentication credentials.
- D. Attempts by attacks to access the user and password information stores in the company's SQL database.

Correct Answer: C

QUESTION 2

You have compromised a server and successfully gained a root access. You want to pivot and pass traffic undetected over the network and evade any possible Intrusion Detection System.

What is the best approach?

- A. Install and use Telnet to encrypt all outgoing traffic from this server.
- B. Install Cryptcat and encrypt outgoing packets from this server
- C. Use Alternate Data Streams to hide the outgoing packets from this server.
- D. Use HTTP so that all traffic can be routed via a browser, thus evading the internal Intrusion Detection Systems.

Correct Answer: A

QUESTION 3

While scanning a network you observe that all of the web servers in the DMZ are responding to ACK packets on port 80.

What can you infer from this observation?

- A. They are using Windows based web servers.
- B. They are using UNIX based web servers.
- C. They are not using an intrusion detection system.
- D. They are not using a stateful inspection firewall.

Correct Answer: D

QUESTION 4

Your company performs penetration tests and security assessments for small and medium- sized business in the local area. During a routine security assessment, you discover information that suggests your client is involved with human trafficking.

What should you do?

- A. Copy the data to removable media and keep it in case you need it.
- B. Ignore the data and continue the assessment until completed as agreed.
- C. Confront the client on a respectful manner and ask her about the data.
- D. Immediately stop work and contact the proper legal authorities.

Correct Answer: D

QUESTION 5

Which of the following levels of algorithms does Public Key Infrastructure (PKI) use?

- A. RSA 1024 bit strength
- B. AES 1024 bit strength
- C. RSA 512 bit strength
- D. AES 512 bit strength

Correct Answer: A
