QUESTION 1

Joe works as a threat intelligence analyst with Xsecurity Inc. He is assessing the TI program by comparing the project results with the original objectives by reviewing project charter. He is also reviewing the list of expected deliverables to ensure that each of those is delivered to an acceptable level of quality.

Identify the activity that Joe is performing to assess a TI program\\'s success or failure.

A. Determining the fulfillment of stakeholders

B. Identifying areas of further improvement

C. Determining the costs and benefits associated with the program

D. Conducting a gap analysis

Correct Answer: D

QUESTION 2

Steve works as an analyst in a UK-based firm. He was asked to perform network monitoring to find any evidence of compromise. During the network monitoring, he came to know that there are multiple logins from different locations in a short time span. Moreover, he also observed certain irregular log in patterns from locations where the organization does not have business relations. This resembles that somebody is trying to steal confidential information.

Which of the following key indicators of compromise does this scenario present?

A. Unusual outbound network traffic

B. Unexpected patching of systems

C. Unusual activity through privileged user account

D. Geographical anomalies

Correct Answer: C

QUESTION 3

ABC is a well-established cyber-security company in the United States. The organization implemented the automation of tasks such as data enrichment and indicator aggregation. They also joined various communities to increase their knowledge about the emerging threats. However, the security teams can only detect and prevent identified threats in a reactive approach.

Based on threat intelligence maturity model, identify the level of ABC to know the stage at which the organization stands with its security and vulnerabilities.

A. Level 2: increasing CTI capabilities

B. Level 3: CTI program in place

C. Level 1: preparing for CTI

D. Level 0: vague where to start

Correct Answer: A

QUESTION 4

A threat analyst obtains an intelligence related to a threat, where the data is sent in the form of a connection request from a remote host to the server. From this data, he obtains only the IP address of the source and destination but no contextual information. While processing this data, he obtains contextual information stating that multiple connection requests from different geo-locations are received by the server within a short time span, and as a result, the server is stressed and gradually its performance has reduced. He further performed analysis on the information based on the past and present experience and concludes the attack experienced by the client organization.

Which of the following attacks is performed on the client organization?

A. DHCP attacks

B. MAC spoofing attack

C. Distributed Denial-of-Service (DDoS) attack

D. Bandwidth attack

Correct Answer: C

QUESTION 5

An XYZ organization hired Mr. Andrews, a threat analyst. In order to identify the threats and mitigate the effect of such threats, Mr. Andrews was asked to perform threat modeling. During the process of threat modeling, he collected important information about the treat actor and characterized the analytic behavior of the adversary that includes technological details, goals, and motives that can be useful in building a strong countermeasure.

What stage of the threat modeling is Mr. Andrews currently in?

A. System modeling

B. Threat determination and identification

C. Threat profiling and attribution

D. Threat ranking

Correct Answer: C
