QUESTION 1

Drag and drop the correct port security configuration on the left to the correct action on the right.

Select and Place:

ShutDown	Shuts down the interface that received the packet triggering the violation.
Errdisable	The address that triggered the securoty violaton is learned, but any traffic from the address is dropped.
Restrict	Confogure the devide to re-enable the interface automatically if a shutdown occurs.
Protect	Drops ingress traffic from any nonsecure MAC addresses. The device keeps a count of the number of dropped packets.

Correct Answer:

|	
	ShutDown
	Protect	m the
	Errdisable	occurs.
	Restrict	count of the

QUESTION 2

Select and Place:

There are two types of resources that can be allocated to a virtual context: memory resources and rate resources. Drag three correct rate resources from left into the chart on the right.

connections per second	Rate Resources
stickiness table entries	
address translations	
HTTP compression performance	
concurrent connections through the context	
bandwidth through the context	

Correct Answer:

There are two types of resources that can be allocated to a virtual context: memory resources and rate resources. Drag three correct rate resources from left into the chart on the right.

	Rate Resources
stickiness table entries	bandwidth through the context
address translations	HTTP compression performance
	connections per second
concurrent connections through the context	

QUESTION 3

Refer to the exhibit.

The servers in this network are connected to an A-B SAN design. What is required for hosts to support a high-availability Fibre Channel connection to a storage controller?

A. Multipath drivers should be installed on all the servers.

B. Multipath drivers should be installed on the CNA of S1 and S3.

C. High availability for Fibre Channel is controlled by the storage controller, and there is no need to add or make changes on the server side.

D. S1 and S3 require that multipath drivers are installed, but S2 does not.

E. Multipath drivers should be installed on all CNAs of all servers.

Correct Answer: A

QUESTION 4

Which three statements best describe multicast operation on Cisco Nexus switches in a data center? (Choose three.)

A. Cisco NX-OS Software does not support PIM dense mode.

B. The command ip multicast-routing must be enabled in Cisco NX-OS Software before any multicast configuration is possible on the switch.

C. PIM CLI configuration and verification commands are not available until you enable the PIM feature with the feature pim command.

D. Cisco NX-OS Software supports multicast routing per Layer 3 VRF instance.

E. The default PIM operational mode on the Cisco Nexus 7000 switch is SSM.

Correct Answer: ACD

QUESTION 5

Refer to the exhibit.

```
configure terminal

vlan 100

interface vlan 100
ip address 10.10.100.1/24
no shutdown
```

The interface remains in a down state after entering the command that is shown in the exhibit. What is the cause of the problem?

A. The feature interface-vlan command must be configured.

B. The VDC contains only F1 interfaces.

C. There are IP address conflicts.

D. The VDC is "type OTV."

E. The command copy run start was not entered.

Correct Answer: B
