QUESTION 2

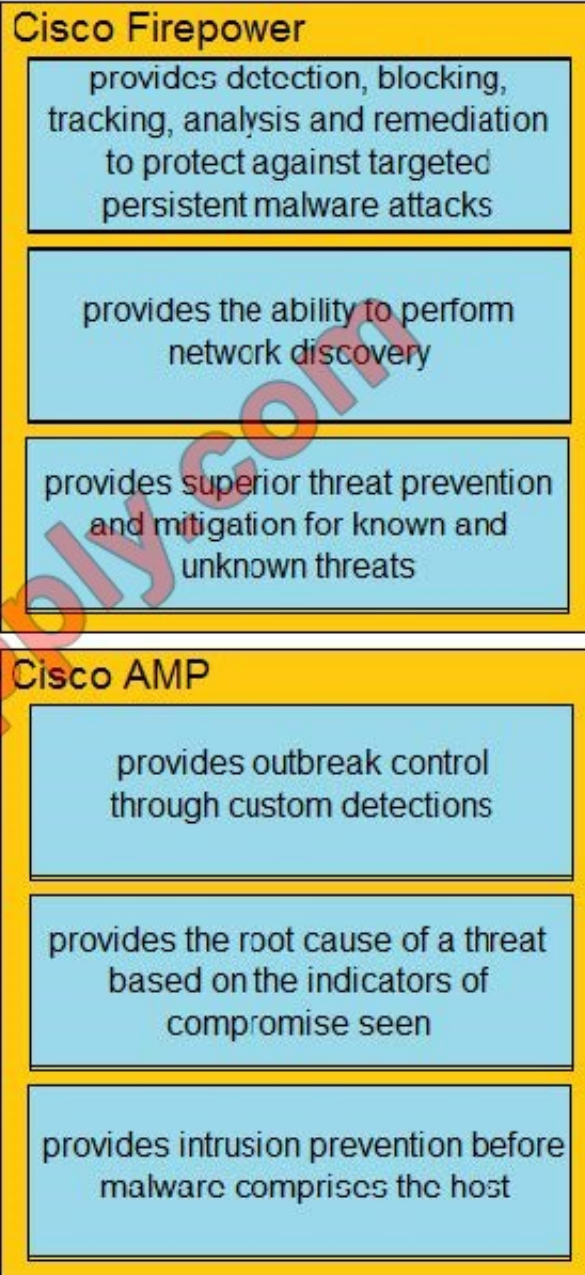

DRAG DROP

Drag and drop the capabilities of Cisco Firepower versus Cisco AMP from the left into the appropriate category on the right.

Select and Place:

Correct Answer:

Description automatically generated with low confidence ExplanationThe Firepower System uses network discovery and identity policies to collect host, application, and user data for traffic on your network. You can use certain types of discovery and identity data to build a comprehensive map of your network assets, perform forensic analysis, behavioral profiling, access control, and mitigate and respond to the vulnerabilities and exploits to which your organization is susceptible.The Cisco Advanced Malware Protection (AMP) solution enables you to detect and block malware, continuously analyze for malware, and get retrospective alerts. AMP for Networks delivers network- based advanced malware protection that goes beyond point-in-time detection to protect your organization across the entire attack continuum ?before, during, and after an attack. Designed for Cisco Firepower?network threat appliances, AMP for Networks detects, blocks, tracks, and contains malware threats across multiple threat vectors within a single system. It also provides the visibility and control necessary to protect your organization against highly sophisticated, targeted, zero-day, and persistent advanced malware threats.

QUESTION 3

Which cloud service model offers an environment for cloud consumers to develop and deploy applications without needing to manage or maintain the underlying cloud infrastructure?

- A. PaaS
- B. XaaS
- C. IaaS
- D. SaaS

Correct Answer: A

Reference: CCNP and CCIE Security Core SCOR 350-701 Official Cert Guide

QUESTION 4

Which API is used for Content Security?

- A. NX-OS API
- B. IOS XR API
- C. OpenVuln API
- D. AsyncOS API

Correct Answer: D

QUESTION 5

A network engineer is deciding whether to use stateful or stateless failover when configuring two ASAs for high availability. What is the connection status in both cases?

- A. need to be reestablished with stateful failover and preserved with stateless failover
- B. preserved with stateful failover and need to be reestablished with stateless failover
- C. preserved with both stateful and stateless failover
- D. need to be reestablished with both stateful and stateless failover

Correct Answer: B
