QUESTION 1

Which VPN technology requires the use of an external key server?

- A. GETVPN
- B. GDOI
- C. SSL
- D. DMVPN
- E. IPsec
- F. L2TPv3

Correct Answer: A

A GETVPN deployment has primarily three components, Key Server (KS), Group Member (GM), and Group Domain of Interpretation (GDOI) protocol. GMs do encrypt/decrypt the traffic and KS distribute the encryption key to all the group members. The KS decides on one single data encryption key for a given life time. Since all GMs use the same key, any GM can decrypt the traffic encrypted by any other GM. GDOI protocol is used between the GM and KS for group key and group SA management. Minimum one KS is required for a GETVPN deployment.
