### QUESTION 1

A customer is upgrading an existing ERS 8610 with the 8692SF to software version 7.x. Which statement regarding the upgrade is correct?

- A. The customer must upgrade the 8692SF to an 8893SF for software release 7.x.
- B. The customer can run 7.x with the existing 8692SF, although some features will be disabled.
- C. The customer can add the SuperMezz module to the 8692SF and run release 7.x.
- D. The customer must upgrade to an ERS 8810 chassis to run software release 7.x.

Correct Answer: C

---

### QUESTION 2

A technician has compiled the configuration of an Ethernet Routing (ERS) 5520 to and now must transfer a backup copy of configuration file to server. Which command is used to accomplish this task?

- A. 5520.24T-PWR> copy config ftp filename ers5520 config.cfg
- B. 5520-24T-PWR# copy config ftp filename ers5520config.cfg
- C. 5570-74T PWR# copy config tftp filename ers5520Config.cfg
- D. 5520-24T-PWR# copy config scp filename ersS520conftg.cfg

Correct Answer: C

---

### QUESTION 3

You are configuring a QoS Policy on an ERS RS or 8800 module to police the ingress data rate on a port with the following ACLI command on the interface level: qos if-policer police-rate 10000. What other two ACLI commands are required on the edge interface? (Choose two.)

- A. (config)#interface qos enable.
- B. (config-if)#enable-diffserv enable.
- C. (config-if)#access-diffserv enable.
- D. (config-if)#no core-diffserv enable.

Correct Answer: BC

---

### QUESTION 4

To provide load distribution across two or more equal cost paths in a Layer 3 routing environment, the ECMP feature

can be used to maximize load sharing. Which two statements correctly describe the ECMP features? (Choose two)

- A. All ECMP next hop addresses are in the routing table
- B. ECMP keeps traffic between two IP addresses on one single path.
- C. All ECMP paths are active and forwarding traffic.
- D. ECMP routes apply to OSPF, RIP and BGP only.

Correct Answer: AC

---

#### QUESTION 5

On the Ethernet Routing Switch (ERS) 8800, the Virtual Routing Forwarding (VRF)-Lite feature supports multicast virtualization. Which statements about multicast virtualization are true? (Choose two)

- A. Multicast virtualization is fully supported in high availability mode and there is no interruption to traffic in the event of the failure of a CPU.
- B. Multicast virtualization requires version 7.1 or later.
- C. To facilitate multicast route redistribution between VRFs, an external unicast edge router is required.
- D. Many IGMP and PIM commands that you use on the Global Router also apply to VRFs that create.

Correct Answer: AD
