QUESTION 1

A leading steel manufacturer relies on SAP for purchase, sales, add invoice processing.

1.

It is planning to virtualize its severs to reduce CAPEX and OPEX.

2.

However, its CIO is concerned about the availability, performance, manageability, recoverability, and security for the SAP database and ERP instance. Match the business requirement with the appropriate design concept.

Select and Place:

Business Requirement	Design Concept
The application must scale within two hours.	Manageability
The application must support clustering between physical and virtual machines.	Performance
The application must be restored in 30 minutes in case.	Recoverability
The application data must be encrypted at rest.	Security
The application must generate 200 invoices concurrently.	Availiability

Correct Answer:

Business Requirement	Design Concept
	The application must support clustering between physical and virtual machines.
	The application must generate 200 invoices concurrently.
	The application must be restored in 30 minutes in case.
	The application data must be encrypted at rest.
	The application must scale within two hours.

QUESTION 2

A company uses Strick Lockdown mode in the design for a new data center, but the vSphere administrator must still allow access to an ESXi host for third-party solutions. How is it possible to override and add trusted users?

A. Use DCUI Access

B. Use Exception Users

C. Use Security Profiles

D. Use Promiscuous Mode

Correct Answer: B

The host can only be accessed through vCenter Server. If SSH or the ESXi Shell is enabled, running sessions for accounts in the DCUI.Access advanced option and for Exception User accounts that have administrator privileges remain enabled. All other sessions are terminated.

QUESTION 3

Match the business statement to its appropriate concept.

Select and Place:

Business statement	Concept
The operations must be automated and scable	Security
The transactions must be services in under 2ms.	Performance
The maximum recovery time objective is two hours.	Availability
The integrity of transactions cannot be compromised.	Manageability
The services cannot be interrrrupted for more than 5 minutes per year.	Recoverability

Correct Answer:

Business statement	Concept
	The integrity of transactions cannot be compromised.
	The transactions must be services in under 2ms.
	The services cannot be interrrupted for more than 5 minutes per year.
	The operations must be automated and scable
	The maximum recovery time objective is two hours.

QUESTION 4

A company has one data center site running 50 hosts and 400 virtual machines and requires a vSphere 6.5 design.

1.

 The CIO wants to add a secondary site for Disaster Recovery (DR) with A hours RPO.

2.

 The application developer is concerned about anticipated growth as several new projects begin.

3.

 The CISO is worried about data leaks and theft.

4.

 The CTO would like to buy new servers with better specifications and higher consolidation ratio.

Determine the critical requirements for each of the key stakeholders. Some requirements might have more than one stakeholder.
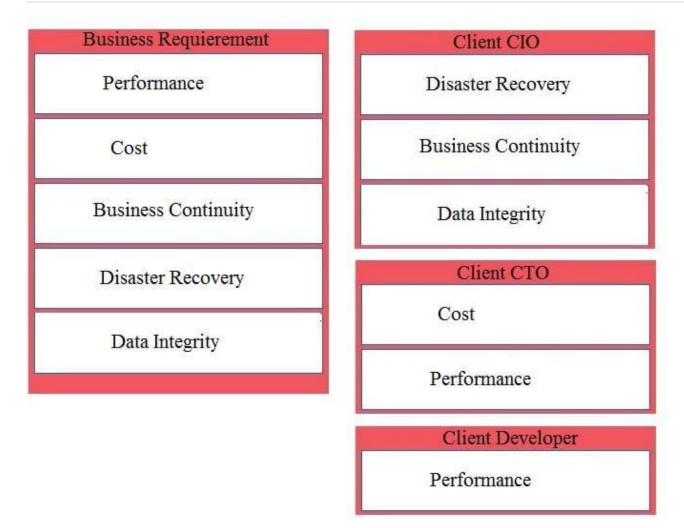

Select and Place:

Business Requierement
Performance
Cost
Business Continuity
Disaster Recovery
Data Integrity

Client CIO
Place here.
Place here.
Place here.

Client CTO
Place here.
Place here.

Client Developer
Place here.

Correct Answer:

Business Requierement	Client CIO
Performance	Disaster Recovery
Cost	Business Continuity
Business Continuity	Data Integrity
Disaster Recovery	**Client CTO**
Data Integrity	Cost
	Performance
	Client Developer
	Performance

QUESTION 5

A management company has requested that a new vSphere 6.5 design be developed to protect its existing data center investment while it expands to a second data center site and introduces process automation.

1.

The existing environment consists of 32 vSphere 6.0 hosts attached to an iSCSI storage array containing external customer financial and medical records used by its investment and medical services divisions.

2.

The customer is also interested in the ability to expand to and failover to a public cloud. Which two valid assumptions can be made about the new design? (Choose two.)

A. The storage array is listed in the VMware Compatibility Guide (HCL/VCG) for vSphere 6.5. 12

B. The resulting design should utilize the existing hardware choices.

C. Sufficient power and cooling exists in the second data center.

D. Sufficient bandwidth exists between the sites for cross-cluster vMotion.

Correct Answer: CD
