QUESTION 1

A bank has requested assistance with developing a backup design for its vRealize Automation platform. They would like system backups to be crash-consistent in the event of an outage. What are three guidelines that should be followed when planning these backups? (Choose three.)

A. Minimize the number of active transactions before beginning a backup. Plan a regular backup for when the system is least active.

B. For non-virtual workloads, back up installation directories as required.

C. When backing up the complete system, back up all instances of the vRealize Automation appliance and databases as close to each other as possible, preferably within seconds.

D. Create a backup of instances of the vRealize Automation appliance and the IaaS components when updating certificates.

E. When backing up the complete system, back up all instances of the vRealize Automation appliance one at a time to preserve availability.

Correct Answer: ACD

QUESTION 2

The architect for a vRealize Automation project met with the IT team and identified the following requirements:

1.

 Fine grained logging and monitoring of all events

2.

 99.99% SLA of the custom portal

3.

 Utilize built-in functionality

4.

 HIPAA Compliance

5.

 API calls to vRA and NSX

6.

 Custom Portal

7.

Ability for 150 concurrent DEM wokflows

To which infrastructure quality would the `Ability for 150 concurrent DEM workflows\\' technical requirement map?

A. Manageability

B. Recoverability

C. Security

D. Performance

Correct Answer: D

QUESTION 3

An architect is tasked with designing a multi-region Software Defined Data Center (SDDC) deployment. The operations team has mandated that the solution enable real-time logging for all automation components. The architect makes a design decision to use a vRealize Log Insight cluster in each region, consisting of a total of three nodes. Which three data sources are required to be in scope? (Choose three.)

A. vRealize Automation Appliance

B. NSX Manager, NSX Controller instances and NSX Edge instances

C. vRealize Operations Manager

D. vRealize Orchestrator

E. vRealize IaaS Server

Correct Answer: ABC

QUESTION 4

Which design would allow for an infrastructure team to authorize all snapshots taken by vReafize Automation users?

- Design an approval policy for the Policy Type: Service Catalog - Resource Action Request - Create Snapshot - Virtual Machine.
- Ensure that the Approval Required = Any and that it is assigned to the infrastructure team.

- Design a custom XaaS workflow and add it to the provisioning blueprint.
- Configure the XaaS workflow to notify the infrastructure team on any 'Create Snapshot - Virtual Machine' request. The workflow waits for user input prior to running the Create Snapshot workflow.

- Design an Event Broker subscription that triggers on a 'Create Snapshot - Virtual Machine' event type.
- Configure the Event Broker workflow to send an email to the infrastructure team for notification before running a Create Snapshot workflow.

- Design an approval policy for the Policy Type: Service Catalog - Catalog Item Requests - Create Snapshot - Virtual Machine.
- Ensure that the Approval Required = All and that it is assigned to the infrastructure team.

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: A

QUESTION 5

A company has a service called Databases with a MySQL and a PostgreSQL catalog item within it. The architect has created a new blueprint for MS SQL Server and added the published catalog item to the Databases service. Management has requested that the MS SQL Server catalog item be available only to the Enterprise business group. Currently, the Developers business group has access to the entire Databases service with the existing MySQL and PostgreSQL catalog items. Which two should the architect recommend to reconfigure Developers and Enterprise entitlements to meet these requirements? (Choose two.)

A. Edit the Enterprise entitlement and add the MS SQL Server catalog item.

B. Edit the Enterprise entitlement and add the Databases service and the MS SQL Server catalog item.

C. Edit the Developers entitlement and remove the Databases service and add the MySQL and PostgreSQL catalog items individually.

D. Edit the Developers entitlement and add the MySQL and PostgreSQL catalog items individually.

Correct Answer: AD
