QUESTION 1

A customer is struggling with how to support application delivery to its highly mobile sales force. There are two Windows applications that need to be delivered, which could present a challenge. Both applications use a local copy of the central database and the applications are frequently being updated.

During assessments and user interviews, the sales personnel indicated that they frequently use these two applications while traveling in areas with poor connectivity. The sales people rarely connect to the company network. Pushing out updates using a traditional deployment system is therefore difficult.

Which solution from VMware would solve the customer\'s situation?

A. Package the applications as an App Volumes Appstack. Manage delivery and updates off the Appstack using VMware Identity Manager.

B. Package the applications using ThinApp and manage delivery and updates using VMware Identity Manager.

C. Install the applications on RDS Hosts and publish them using Horizon 7. Since installed centrally, management of the applications will now be possible using traditional methods.

D. Package the application using ThinApp for isolation and publish them to users using Horizon 7. Place the ThinApp packages on a network share for central and easy updates.

Correct Answer: D

QUESTION 2

An architect is asked to review a company\'s plans to implement ThinApp packaged applications to its non-persistent Virtual Desktop Infrastructure (VDI). The applications must be assigned to users and not individual VDI desktops. All ThinApp packages are already available on a network share.

Which two options can the architect recommend to meet requirements? (Choose two.)

A. Using Microsoft Active Directory and Group Policy Objects, deploy the ThinApp MSI file upon login of the users.

B. In the Horizon Administration console, add the network share with the ThinApp packages. Entitle ThinApp packages using the Horizon Administration console.

C. Copy the Thinapped MSI to an App Volumes App Stack and assign the application via Active Directory.

D. Using thinreg.exe, add ThinApp packages registration and use the PermittedGroups option for the identified user groups.

E. Implement VMware Identity Manager, install the VMware Identity Manager for Windows on all VDI desktops and entitle the ThinApp packages using VMware Identity Manager.

Correct Answer: AB

QUESTION 3

A customer is looking to implement Horizon View Windows desktops for a 500-seat call center operating under these

conditions:

1.

Three 8-hout shifts

2.

First and second shifts are 100% staffed

3.

Third shift operates with reduced staffing of only 200 representatives

Management is frustrated by the lack of productivity that occurs during shift changeover. Logoff and logon processes take in excess of 5 minutes.

The customer has asked an architect to recommend the most cost-effective configuration that provides the shortest possible amount of downtime between shifts.

Which two should the architect choose? (Choose two.)

A. Deploy named user licenses.

B. Create an instant clone pool.

C. Create a full clone pool.

D. Deploy concurrent licenses.

E. Capture Windows applications as a Thin App.

Correct Answer: BD

QUESTION 4

The IT team for a company wants to deploy VMware Horizon and allow end users to access their Horizon Windows desktops using Windows laptops, Android and iOS mobile phones, and Android and iOS tablets with the following requirements:

1.

High data security

2.

Low client bandwidth

3.

Low client processor overhead

4.

Low storage space

5.

 High image quality

Which Horizon desktop pool meets these requirements?

A. Instant Clones Refresh OS disk after logoff: enabled Default display protocol: PCoIP Allow users to choose protocol: disabled Adobe Flash throttling: conservative

B. Linked Clones Refresh OS disk after logoff: enabled Default display protocol: Blast Extreme Allow users to choose protocol: disabled Adobe Flash throttling: conservative

C. Linked Clones Refresh OS disk after logoff: enabled Default display protocol: RDP Allow users to choose protocol: disabled Adobe Flash throttling: aggressive

D. Instant Clones Refresh OS disk after logoff: enabled Default display protocol: RDP Allow users to choose protocol: disabled

Correct Answer: A

QUESTION 5

A small government organization wants to implement stateless desktops using VMware products. The IT team is unable to add or alter any GPO in the organization\\'s Active Directory. It wants to minimize the storage space required for the user VMs and preserve user\\'s profiles and other personalization settings.

Which accomplishes these goals?

A. Horizon Instant Clone desktop pools with VMware User Environment Manager

B. Horizon RDS desktop pools with App Volumes Writable Volumes

C. Horizon Full VM desktop pools with App Volumes Writable Volumes

D. Horizon Linked Clones desktop pools with persistent disks

Correct Answer: D
