QUESTION 1

Company A decided to start using GPO to optimize PCoIP across all their Horizon 7 Desktop pools. During the Proof of Concept (POC) on the local network, there were no performance issues. The company decided to move to UAT. Access from the outside network needs to be tested. Some sales staff traveling to overseas countries, where network speed is low, have reported that the screen quality is degraded during usage.

Which setting should be recommended to retain screen quality, regardless of a user\\'s connection?

A. Configure the PCoIP session bandwidth floor value.

B. Configure PCoIP client image cache size policy.

C. Turn on Build-to-Lossless feature.

D. Configure the maximum PCoIP bandwidth session.

Correct Answer: C

QUESTION 2

A company has decided to virtualize all of its helpdesk employee\\'s workstations. These requirements must be met:

1.

 All applications used by the employees will be published through RDS hosted application.

2.

 Users will NOT be allowed to store any personal data on their Horizon desktops.

3.

 The Horizon desktop design should meet maximum storage space efficiency.

4.

 The Horizon desktop design should meet maximum performance.

5.

 The Horizon desktop design should meet maximum power savings.

Which three features can be enabled to meet the company\\'s requirements? (Choose three.)

A. Full clones

B. Instant clones

C. Space Efficient disk format (SEsparse)

D. Content-based read cache (CBRC)

E. Virtual SAN (vSAN)

Correct Answer: BCD

QUESTION 3

A customer is struggling with how to support application delivery to its highly mobile sales force. There are two Windows applications that need to be delivered, which could present a challenge. Both applications use a local copy of the central database and the applications are frequently being updated.

During assessments and user interviews, the sales personnel indicated that they frequently use these two applications while traveling in areas with poor connectivity. The sales people rarely connect to the company network. Pushing out updates using a traditional deployment system is therefore difficult.

Which solution from VMware would solve the customer\\'s situation?

A. Package the applications as an App Volumes Appstack. Manage delivery and updates off the Appstack using VMware Identity Manager.

B. Package the applications using ThinApp and manage delivery and updates using VMware Identity Manager.

C. Install the applications on RDS Hosts and publish them using Horizon 7. Since installed centrally, management of the applications will now be possible using traditional methods.

D. Package the application using ThinApp for isolation and publish them to users using Horizon 7. Place the ThinApp packages on a network share for central and easy updates.

Correct Answer: D

QUESTION 4

An architect is designing a solution for a customer who plans to grow its VDI environment. The design must allow for scaling of the environment in incremental steps with predictable results.

Which can the architect recommend for capacity management?

A. Design using a pod and block architecture and verify the capacity of the configured block. Add as blocks needed.

B. Design the environment around traditional all-flash SAN to ensure that there are no scaling issues.

C. Design the environment using vSAN ready nodes. Add more nodes as needed.

D. Design using servers that can accept 768GB of RAM so that there are no scaling issues.

Correct Answer: A

QUESTION 5

DRAG DROP

Match the customer issue with a VMware Horizon View solution.

Select and Place:

Customer Issue

Legacy app with Internet Explorer dependency

Complicated logon script for drive mapping

Misuse of licensed software

Install applications on stateless desktop

VMware Solution

[ ] VMware ThinApp packaging

[ ] VMware User Environment Manager

[ ] VMware AppVolumes

[ ] Writeable Volumes

Correct Answer:

Customer Issue

VMware Solution

Misuse of licensed software | VMware ThinApp packaging

Install applications on stateless desktop | VMware User Environment Manager

Legacy app with Internet Explorer dependency | VMware AppVolumes

Complicated logon script for drive mapping | Writeable Volumes
