**QUESTION 1**

What threat categories should you use to prioritize vulnerabilities detected in the pen testing report?

- A. 1, 2, 3, 4, 5
- B. Low, medium, high, serious, critical
- C. Urgent, dispute, action, zero, low
- D. A, b, c, d, e

Correct Answer: B

---

**QUESTION 2**

Rules of Engagement (ROE) document provides certain rights and restriction to the test team for performing the test and helps testers to overcome legal, federal, and policy-related restrictions to use different penetration testing tools and techniques.

Rules of Engagement Template	
<b>DATE:</b>	<i>[Date]</i>
<b>TO:</b>	<i>[Name and Address of NASA Official]</i>
<b>FROM:</b>	<i>[Name and Address of Third Party performing the Penetration Testing]</i>
<b>CC:</b>	<i>[Name and Address of Interested NASA Officials]</i>
<b>RE:</b>	Rules of Engagement to Perform a Limited Penetration Test in Support of <i>[required activity]</i>
<i>[Name of third party] has been contracted by the National Aeronautics and Space Administration (NASA), [Name of requesting organization] to perform an audit of NASA's [Name of risk assessment target]. The corresponding task-order requires the performance of penetration test procedures to assess external and internal vulnerabilities. The purpose of having the "Rules of Engagement" is to clearly establish the scope of work and the procedures that will and will not be performed, by defining targets, time frames, test rules, and points of contact.</i>	

What is the last step in preparing a Rules of Engagement (ROE) document?

- A. Conduct a brainstorming session with top management and technical teams

- B. Decide the desired depth for penetration testing
- C. Conduct a brainstorming session with top management and technical teams
- D. Have pre-contract discussions with different pen-testers

Correct Answer: B

---

### QUESTION 3

Which of the following acts is a proprietary information security standard for organizations that handle cardholder information for the major debit, credit, prepaid, e-purse, ATM, and POS cards and applies to all entities involved in payment card processing?

- A. PIPEDA
- B. PCI DSS
- C. Human Rights Act 1998
- D. Data Protection Act 1998

Correct Answer: B

---

### QUESTION 4

Amazon Consulting Corporation provides penetration testing and managed security services to companies. Legality and regulatory compliance is one of the important components in conducting a successful security audit.

Before starting a test, one of the agreements both the parties need to sign relates to limitations, constraints, liabilities, code of conduct, and indemnification considerations between the parties.

## XSECURITY

### Overview:

Security Assessment needs vary from agency to agency. The XSECURITY Penetration Testing Team (XSECURITY) offers several services that can assist COMPANY X in securing their information technology assets. Each of these services requires some degree of support from the COMPANY X (system information, access to agency personnel or facilities, system/network connections, etc.). Penetration testing tools and techniques can be invasive, however, so there needs to be a clear level of understanding of what an assessment entails, what support is required for assessments, and what potential effect each type of assessment may have.

### Use of Tools

The Penetration testing activities performed by the XSECURITY Penetration Testing Team include scanning network assets with specific penetration testing tools. These tools check system configurations, default settings, security settings/updates, network and workstation services, open ports, and other specific vulnerabilities that might be utilized by intruders or unauthorized staff to undermine or bypass the security of an agency's network. They do not access user files, data files, or other personal/confidential files, only network/workstation files associated with system configurations and security. The XSECURITY does perform 'penetration testing' – that is, test how deep into your network an intruder can go, retrieve confidential information, or change system configurations. Our scans determine what vulnerabilities exist within the agency network with fully exploiting those vulnerabilities.

Which agreement requires a signature from both the parties (the penetration tester and the company)?

- A. Non-disclosure agreement
- B. Client fees agreement
- C. Rules of engagement agreement
- D. Confidentiality agreement

Correct Answer: D

### QUESTION 5

Which one of the following acts related to the information security in the US fix the responsibility of management for establishing and maintaining an adequate internal control structure and procedures for financial reporting?

- A. California SB 1386
- B. Sarbanes-Oxley 2002
- C. Gramm-Leach-Bliley Act (GLBA)
- D. USA Patriot Act 2001

Correct Answer: B
