QUESTION 1

With which components can you group data behind a single instrument? (Select 3)

- A. Hostname
- B. Metric value
- C. Custom pattern
- D. Data source

Correct Answer: ABD

QUESTION 2

What are the default network settings (bandwidth/latency) used when importing a single trace into AppTransaction Xpert?

- A. Estimated bandwidth / estimated latency
- B. 1 Gbps bandwidth / 0 millisecond latency
- C. 1 Gbps bandwidth / estimated latency
- D. Estimated bandwidth / 0 millisecond latency

Correct Answer: C

QUESTION 3

Which of the following are not required to set up pattern-based properties for grouping metrics in a panel? (Select 3)

- A. Create a new property name for each possible value.
- B. Add a description.
- C. Choose the new property name in the panel's grouping configuration.
- D. Enable custom properties either at the server level or dashboard level.

Correct Answer: ABD

QUESTION 4

The AppInternals Xpert Transaction Trace Warehouse can extract usernames from transactions:

- A. Through parsers that extract information from packets

- B. Through an integration with Lightweight Directory Access Protocol (LDAP)
- C. From an application's config file
- D. From the method getRemoteUser() of the HttpServletRequest object

Correct Answer: D

QUESTION 5

All of these reasons represent duplicate packets in AppResponse Xpert, except:

- A. Several switches are sending mirrored packets to AppResponse Xpert and some are seeing the same IP conversations.
- B. Port mirroring is configured in both directions--ingress and egress--on two or more switch ports.
- C. Virtual local area network (VLAN)-based mirroring is configured and ingress and egress mirroring is configured on a VLAN.
- D. Two or more VLANs are mirroring, and duplicates of packets that enter one of those VLANs and exit via the other are visible.
- E. You are mirroring traffic from more than one database server of a cluster.

Correct Answer: E
