QUESTION 1

Correlation policy rules allow you to construct criteria for alerting on very specific conditions. Which option is an example of such a rule?

- A. testing password strength when accessing an application
- B. limiting general user access to administrative file shares
- C. enforcing two-factor authentication for access to critical servers
- D. issuing an alert if a noncompliant operating system is detected or if a host operating system changes to a noncompliant operating system when it was previously profiled as a compliant one

Correct Answer: D

QUESTION 2

How do you configure URL filtering?

- A. Add blocked URLs to the global blacklist.
- B. Create a Security Intelligence object that contains the blocked URLs and add the object to the access control policy.
- C. Create an access control rule and, on the URLs tab, select the URLs or URL categories that are to be blocked or allowed.
- D. Create a variable.

Correct Answer: C

QUESTION 3

Which feature of the preprocessor configuration pages lets you quickly jump to a list of the rules associated with the preprocessor that you are configuring?

- A. the rule group accordion
- B. a filter bar
- C. a link below the preprocessor heading
- D. a button next to each preprocessor option that has a corresponding rule

Correct Answer: C

QUESTION 4

Which option is true when configuring an access control rule?

- A. You can use geolocation criteria to specify source IP addresses by country and continent, as well as destination IP addresses by country and continent.
- B. You can use geolocation criteria to specify destination IP addresses by country but not source IP addresses.
- C. You can use geolocation criteria to specify source and destination IP addresses by country but not by continent.
- D. You can use geolocation criteria to specify source and destination IP addresses by continent but not by country.

Correct Answer: A

QUESTION 5

Which list identifies the possible types of alerts that the Sourcefire System can generate as notification of events or policy violations?

- A. logging to database, SMS, SMTP, and SNMP
- B. logging to database, SMTP, SNMP, and PCAP
- C. logging to database, SNMP, syslog, and email
- D. logging to database, PCAP, SMS, and SNMP

Correct Answer: C
