ACME technologies is deploying a large number of similar UCS blade servers and want to be able to change servers policies at a later time on all blades.

What type of the Cisco UCS design is recommended?

- A. Initial template based service profiles
- B. Updating template based service profile
- C. Updating non-template based service profiles
- D. Initial non-template based service profiles

Correct Answer: B

QUESTION 4

In a USC domain, the Storage role contains storage related privileges, and the Server role contains server related privileges. A user has joined the group that will need to have both Server roles.

What does the UCS administrator need to do in order to accommodate the new user?

- A. Create one user account and assign both roles to that account.
- B. Create two login accounts for the user, one for each role, since an account can only assign one role.
- C. Create one user account and map it to a locale that contains both roles.
- D. Create one user account, but and define two login domains, one for each role.

Correct Answer: A

QUESTION 5

A UCS admin needs to use the department Active Directory (AD) server for UCS user authorization. However, the AD administrator is reluctant to modify the AD schema, but is willing to add Group membership for UCS users.

How is the UCS administrator expected to use AD?

- A. For user authorization but not for authentication.
- B. Use AD Schema User Extensions (AD/SUE) to do an on demand schema modification.
- C. Use the Group membership information to assign the authorization policy with LDAP Group Maps.
- D. Will not be able to use AD, must use the local UCS user database.

Correct Answer: B
