- D. A SFP Type mismatch between the Fabric Interconnects and the upstream LAN switch
- E. A port speed configuration mismatch between the Fabric Interconnects and the upstream LAN switch

Correct Answer: BC

---

#### QUESTION 4

What is the likely cause of an intermittent SAN Boot fails?

- A. Misconfigured SAN boot target in the boot policy of the service profile
- B. LUN ID Mismatch
- C. FCoE used instead of FC
- D. Wrong boot order in the service profile

Correct Answer: A

---

#### QUESTION 5

Which two formats can be configured for Cisco's Call Home email message? (Choose two )

- A. JSON
- B. CSV
- C. Full text
- D. XML

Correct Answer: CD

<http://www.audentia-gestion.fr/cisco/smart-call-home-feature-guide-1611.pdf>

Call Home Message Formats The Call Home feature offers the following message formats:

Short Text -- Suitable for pagers or printed reports.

Plain Text -- Full formatted message information suitable for human reading.

XML -- Matching readable format using Extensible Markup Language (XML) and Adaptive Markup

Language (AML) document type definitions (DTDs).

The XML format enables communication with the Cisco TAC. For user-defined destination profiles, the format options are long-text, short-text, or XML. The default is XML. For the predefined Cisco TAC profile, only XML is allowed.
