QUESTION 1

A user is creating a three-tier application within a vApp in VMware vCloud Director. The application has three requirements:

Two web services, two application servers, and one database Web server components load balanced for increased user experience and redundancy Web servers validate SSL certificates

Which Edge Load Balancer option should be selected while creating the Application Profile to meet the certificate validation requirements of the application?

A. Validate Certificate Locally

B. Persistence

C. Cookie Name

D. Enable SSL Passthrough

Correct Answer: D

QUESTION 2

Which two statements are true about network and time configuration requirements for VMware vCloud Director? (Choose two.)

A. Each VMware vCloud Director server requires a single IP address and a single port.

B. Each VMware vCloud Director server requires two different SSL endpoints.

C. VMware vCloud Director requires a dedicated Active Directory server for communication.

D. VMware vCloud Director host names do not need to resolve by DNS

E. VMware vCloud Director cell servers in the same group must be configured in the same time zone.

Correct Answer: BE

Reference: https://docs.vmware.com/en/vCloud-Director/9.5/com.vmware.vcloud.install.doc/GUID2E0538AF-CE67-46CB-8B3C-88E5AB8F6355.html

QUESTION 3

An administrator is planning a new VMware vCloud Director deployment and is concerned about secure

communications between the clients and servers.

Which step ensures secure communications between the clients and servers?

A. Create a single certificate for each member of the server group and import the certificates into the host keystores.

B. VMware vCloud Director automatically creates self-signed certificates.

C. Create two certificates for the server group and import the certificates into each cell keystore.

D. Create a single certificate and share it with all the members of the server group.

Correct Answer: C

vCloud Director uses SSL to secure communications between clients and servers. Before you install and configure a vCloud Director server group, you must create two certificates for each member of the group and import the certificates into host keystores

QUESTION 4

A customer wants to deploy multiple versions of an application within their organization virtual data center for quality assurance testing. The customer has these requirements:

vApps deployed from the same vApp template from a shared catalog Same MAC and IP address used for each vApp template deployment VM in each App has access to some of the shared services external to the organization virtual data center

Which process meets the customer requirements?

A. Enable the Fenced vApp option during the creation of the vApp.

B. Create an isolated organization network for each vApp.

C. Enable the distributed firewall to separate the virtual machines between vApps.

D. Create a new organization virtual data center and organization network for each deployment of the vApp.

Correct Answer: D

QUESTION 5

VMware vCloud Usage Meter can meter how many vCenter instances?

A. 1

B. 2

C. 25

D. 50

Correct Answer: D
