QUESTION 2

A system administrator recommends a role-based access control implementation which meets these requirements:

Permission to create or upload catalog items
Permission to edit the properties of an independent disk
Permission to change to owner of any catalog in the organization
Permission to modify properties of an organization virtual data center network

Which role meets these requirements while giving the lowest possible permissions to the user?

- A. vApp User
- B. vApp Author
- C. Organization Administrator
- D. Catalog Author

Correct Answer: C

QUESTION 3

A Provider administrator deploys VMware vCloud Usage Meter and attempts to add a vCenter instance for metering purposes. This error is generated:

There was a problem checking the certificate for vcenter.corp.local:443. Unable to connect with vcenter.corp.local on port 443: Connection timed out.

What is the probable cause of this issue?

- A. A firewall is blocking traffic from the vCloud Usage Meter to vcenter.corp.local.
- B. vCloud Usage Meter needs reconfiguring to port 7444 for proper vCenter communication.
- C. vCloud Usage Meter is not configured with an SMTP server.
- D. The Site ID field is unpopulated on the Service Provider Information tab.

Correct Answer: A

QUESTION 4

Which organization virtual data center network type is used for internal communication?

- A. routed
- B. isolated
- C. protected
- D. direct

Correct Answer: B
