QUESTION 1

A service provider is using vRealize Operations Tenant App for chargeback of tenant-used resources.

Which action should the system administrator take to update the price for a CPU and memory consumption?

- A. Change the sizing policy in the VMware Cloud Director provider portal.
- B. Change the pricing policy in the Tenant App UI.
- C. Change the pricing metadata in the concerned Organization VDC in the VMware Cloud Provider portal.
- D. Change the report definition in the vRealize Operations Manager.

Correct Answer: A

QUESTION 2

A cloud provider wants to advertise a new service based in the VMware Cloud Director Object Storage Extension.

Which two statements summarize the functionality of this new service? (Choose two.)

- A. It integrates a tenant's AWS EBS buckets into the tenant's Virtual Data Center.
- B. It provides the capability to store and share structured data within the VMware Cloud Director organization.
- C. It is a standalone middleware service that provides S3 compatible storage capabilities accessible via HTTPS.
- D. It provides the capability to store and share unstructured data within the VMware Cloud Director organization.
- E. It offers multiple storage performance tiers to deploy tenant's workloads.

Correct Answer: CD

QUESTION 3

An administrator is configuring a load balancer for multiple VMware Cloud Director appliances for the console proxy.

Which port number should the administrator use?

- A. 443
- B. 902
- C. 8443
- D. 5480

Correct Answer: C

QUESTION 4

A tenant user wants to increase the size of a VM's hard disk in the VMware Cloud Director Tenant Portal. Which Organization VDC setting can prevent this from actually occurring?

- A. Thin provisioning is enabled for the Organization VDC in which the VM is running.
- B. VM Encryption is enabled for the storage policies used by the Organization VDC.
- C. IOPS Limiting is enabled for the Organization VDC in which the VM is running.
- D. Fast Provisioning is enabled for the Organization VDC in which the VM is running.

Correct Answer: C

QUESTION 5

Which deployment achieves high availability of VMware Cloud Director 10.x when using virtual appliances?

- A. Three application cell appliances with an external database
- B. Three primary appliances and setup database replication
- C. One primary appliance and two application cell appliances
- D. One primary appliance and two standby appliances

Correct Answer: D
