QUESTION 1

A customer is migrating a branch site with a VMware SD-WAN Edge coexisting with the CE. The Edge will be connected to internet link directly while connecting to the CE via a Layer 3 LAN switch. MPLS underlay is the preferred path for communication from this site to branch sites that have no VMware SD-WAN Edges. Communication from this site to branch sites that have VMware SD-WAN Edges should go through overlay.

- A. Use BGP as the routing protocol on the Edge and flag its BGP neighbor to the Layer 3 LAN switch as Uplink.
- B. Use BGP as the routing protocol on the Edge and filter prefixes from CE using Uplink Community
- C. Use BGP as the routing protocol on the Edge and flag its BGP neighbor to PE as Uplink.
- D. Use BGP as the routing protocol on the Edge and flag its BGP neighbor to CE as Uplink.

Correct Answer: C

QUESTION 2

Which three authentication mode options are valid for use on the VMware SD-WAN Edge? (Choose three.)

- A. Certificate Enabled
- B. Certificate Authentication Optional
- C. Certificate Disabled
- D. Certificate Activated
- E. Certificate Accepted
- F. Certificate Required

Correct Answer: ACE

QUESTION 3

A customer has a hybrid VMware SD-WAN deployment and wants to use the SD-WAN Service Reachable feature on the private WAN.

What is the main dependency that must be met for the feature to work?

- A. Internet reachability via the private WAN
- B. Gateway IPs must be routed in the overlay
- C. Default route learned via dynamic routing
- D. Static route for gateway IPs on the edge

Correct Answer: C

QUESTION 4

A customer has deployed VMware SD-WAN solution. An administrator asked to import additional security for traffic going to internet without investigating in new hardware solutions.

- A. Service chaining with DFW in NSX-V
- B. Service chaining with Zscaler Cloud Security Service
- C. Service chaining with DFW in NSX-1
- D. Service chaining with AWS Cloud Security

Correct Answer: D

QUESTION 5

An administrator is looking for a cost effective model of hardware-based Edge for some branch offices. The device must be mounted in rack cabinet, and to meet performance requirements and projected growth, the appliance must support up to 2 Gbps bandwidth.

Which Edge model satisfies these requirements?

- A. Edge 3400
- B. Edge 540
- C. Edge 510
- D. Edge 620

Correct Answer: B
