QUESTION 1

Refer to the exhibit.

After performing a Layer 1 survey using Cisco Spectrum Expert, what is the result indicated by the visual screen?

A. Normal 802.11g activity

B. Microwave oven interference

C. Video camera interference

D. Bluetooth device interference

E. RF jammer

Correct Answer: C

QUESTION 2

After having the kick-off meeting for a new site survey project with your customer, which three factors need to be considered prior to beginning a WLAN site survey? (Choose three.)

A. Will an additional trip to the facility to perform the initial walkthrough be required?

B. How much time should be allocated to survey the locations for the controllers?

C. Will any additional regulatory or safety training be required to complete the site survey?

D. Is access available to all areas of the customer facility where the WLAN is planned to be deployed?

E. Which types of controllers and switches will be required to fully conduct the site survey in all areas of the customer facility?

F. Is access available to customer employees so that initial interviews can be performed?

Correct Answer: ACD

QUESTION 3

Which two basic characteristics would be needed from antennas used for survey and deployment in various indoor situations? (Choose two.)

A. Horizontally polarized

B. Vertically polarized

C. Aesthetically fitting

D. Least cost

E. Highest gain

F. Largest beamwidth

Correct Answer: BC

QUESTION 4

A new client has contacted you to design a WLAN solution for a new 30-foot high-bay warehouse that will use high-lift electric forklifts. The warehouse is currently empty except for storage racks. The customer is planning to continue to use their existing wireless barcode scanners and also deploy wireless IP phones for communication. Which four issues do you need to consider prior to performing the site survey? (Choose four.)

A. Which protocol do the wireless barcode scanners and IP phones need to use?

B. What is the proximity to other warehouses?

C. Which types of goods will be stored in the warehouse and what is the expected average warehouse capacity?

D. Do any planned WLC locations exceed 100 meter cable distances?

E. Is there sufficient clearance between the roof and the top of the racks for placing APs?

F. What is the expected humidity level in the warehouse on average during the year?

G. Are there any secure enclosures that use chain-link fence that will require wireless access?

Correct Answer: ACEG

QUESTION 5

Which two factors influence the density of APs in a data-only WLAN environment? (Choose two.)

A. Channel reuse and WLAN bandwidth

B. The type of controller chosen.

C. The defined coverage area and customer needs.

D. The number of clients that will roam through the facility.

E. The number of APs dedicated to voice services.

Correct Answer: AC
