QUESTION 1

A support technician is reviewing wireless configurations for a voice network. They notice the off channel scan defer has been set for 4, 5, and 6. What would occur if the technician was to deselect 5 and 6?

- A. The access points would go off channel to scan whether there were voice devices transmitting or not.
- B. The access points would only go off channel to scan if there were devices transmitting with a UP of 4.
- C. Wireless clients transmitting at a UP of 5 will cause the access point to cease going off channel to scan.
- D. Cameras transmitting with a UP of 4 will cause the access point to go off channel to scan.

Correct Answer: A

QUESTION 2

Which two pieces of information from the Cisco WLC v7.0 GUI does Monitor > Clients provide about a VoWLAN client? (Choose two.)

- A. RSSI at current AP
- B. WMM state
- C. current MOS
- D. current RF channel
- E. current data rate

Correct Answer: AB

QUESTION 3

When reviewing a design for a voice over wireless deployment, what per-call bandwidth cost should be factored in when determining maximum calls per cell using SIP and G.711u as the codec?

- A. 80 bytes
- B. 64 bytes
- C. 10 bytes
- D. 8 bytes

Correct Answer: A

QUESTION 4

Which two statements are correct if IGMP snooping is enabled on a Cisco WLC v7.0? (Choose two.)

- A. The router IGMP table is updated with the IP address of the wireless clients as the last reporter.
- B. The IGMP packets from the wireless clients are forwarded to the router without modifications.
- C. The IGMP packets from the wireless clients are received at the Cisco WLC, which generates a query for the client.
- D. The IGMP packets from the wireless clients are received at the WLC and are used to update the router via a Cisco Group Management Protocol update from the Cisco WLC.
- E. The router IGMP table is updated with the IP address of the Cisco WLC as the last reporter.

Correct Answer: CE

QUESTION 5

An engineer has installed a new voice WLAN. Which three configurations would the engineer verify for QoS on the controller? (Choose three.)

- A. IEEE 802.1X and Cisco Centralized Key Management
- B. Platinum QoS for the VoWLAN
- C. WMM allowed
- D. client load balancing
- E. client band select
- F. DHCP address assignment required

Correct Answer: ABC
