QUESTION 1

Refer to siloed applications. Which option provides a suitable description?

- A. Committing siloed resources to a specific application allows for high utilization.
- B. Over provisioning siloed resources is a cost-effective way to anticipate growth.
- C. The process of deal locating and reallocating siloed resources can be more costly than purchasing new equipment.
- D. Redeploying siloed resources raises capital expenditure (CapEx) but reduces operational expenditure (OpEx)

Correct Answer: C

QUESTION 2

To ensure the ability of data recovery after a severe disruptive event, you recommend the customer firstly using a storage area network. In this way, his stored data would be as up to date and as safe as possible. Refer to these recommendations involving Cisco products, which one is the most useful?

- A. recommend using the built-in Continuous Data Protection capability of the Cisco Storage Services Module
- B. recommend that the customer consider using the Cisco SANT ap to facilitate a Continuous Data Protection solution
- C. recommend using the Cisco Data Mobility Manager capability of the Cisco Storage Services Module to enable an instantaneous copy of all data from the primary disks to secondary disks
- D. recommend using the Cisco Network Assisted Storage Backup to ensure that the customer has a full tape backup of all data

Correct Answer: B

QUESTION 3

Which issue is likely to be a pain point for the data center manager?

- A. shareholder value
- B. unanticipated downtime
- C. good corporate citizenship
- D. Cisco Catalyst 6500 Series Switches configuration using CLI

Correct Answer: B

QUESTION 4

Which issue is likely to be a security pain point highlighted by the chief security officer in a security audit of data center

operations?

- A. Security policies are fragmented across the data center, and there is no centralized point of management and control.
- B. Fiber optic cables should be used throughout the data center because they are less vulnerable to interception technology than copper cables.
- C. The data center does not need both intrusion detection systems and firewalls because they are complementary technologies and overlap in many respects.
- D. Using 10 Gigabit Ethernet connections makes the speed of an attack from outside the corporation a significant security vulnerability, because reaction times to any intrusion must be 10 times faster than it is when using Gigabit Ethernet.

Correct Answer: A

QUESTION 5

The latest processors used in the Cisco Unified Computing System are providing environmental benefits. Explain how it is realized.

- A. They result in a server-free backup that saves energy.
- B. They offer a two-channel (128-bit) memory interface.
- C. They use a lead and tin solder alloy to attach the silicon die to the packaging material.
- D. They use lead- and halogen-free products.

Correct Answer: D
