QUESTION 1

As a network engineer, you know that the Cisco Unified Computing Systems differ from competitors like HP and Dell. What are three main features of Cisco Unified Computing Systems? (Choose three.)

- A. professional service offerings
- B. memory expansion capacity
- C. virtualization optimization
- D. service profile portability

Correct Answer: BCD

QUESTION 2

Having which of these is a significant benefit of Cisco's data center end-to-end strategy?

- A. service-oriented architecture
- B. service-oriented backbone network
- C. service-oriented infrastructure
- D. service-oriented networked Ethernet transmission connection system

Correct Answer: C

QUESTION 3

A customer is considering a full data center virtualization strategy and is deferring network buying decisions. The customer intends to implement VMware before compatibility testing for storage and networking. How could the buying decision be brought forward?

- A. Make sure that the customer understands that Cisco has the only complete network solution sets approved by VMware.
- B. Quietly ensure that the customer knows that Cisco will shortly be announcing a version of VMware as an embedded network service, so compatibility with Cisco equipment can be guaranteed.
- C. Make sure that the customer understands that Cisco has a financial stake and a place on the board of VMware, so whatever VMware is doing, Cisco is tracking. Any networking products bought from Cisco today are guaranteed to be upgraded to match any changes made by VMware.
- D. Explain how the Cisco VFrame Data Center has been tested and approved to provision not only VMware but also the Cisco networking solutions; so today's purchase of Cisco networking equipment automatically integrates into a wider data center virtualization strategy, satisfying both the needs of the existing data center and adapting the virtualized environment as it evolves.

Correct Answer: D

QUESTION 4

Which Cisco MDS feature can protect data at rest?

- A. SME
- B. DMM
- C. IPSec
- D. SANTap

Correct Answer: A

QUESTION 5

It is possible for a user to run Cisco storage networking solutions in cooperation with his Brocade and legacy McData switches. It is supported by what feature?

- A. Line card expansion modules may have Fibre Channel ports, 10 Gigabit Ethernet ports, or a combination of both to accommodate switches from other vendors.
- B. Cisco storage networking devices can run either the Cisco MDS SAN-OS or Cisco NX-OS operating system to match the operating systems that are running on devices from other vendors.
- C. Interoperability modes allow VSANs to be propagated from the Cisco MDS to other Fibre Channel devices.
- D. Because Fibre Channel is based on a set of open standards, Cisco solutions are fully compatible with other Fibre Channel devices.

Correct Answer: C
