QUESTION 1

Which of the following definitions best describes business requirements development within the prepare phase?

- A. a set of service component activities that assesses and documents the business requirements of a customer
- B. part of the systems design activity that identifies and documents business requirements to help deploy network technologies
- C. part of the high-level design activity that addresses business and technical requirements of the customer
- D. a service component activity that analyzes business requirements and recommends the appropriate technology strategy

Correct Answer: A

QUESTION 2

In the implement phase, staging involves installation and testing the customer's solution components in a non-production lab environment. Which of the following defines the benefit to the partner?

- A. A properly planned and executed Day 1 support plan improves the customer's and their end-users' satisfaction with the implemented solution.
- B. Staging validates the system and proactively identifies and resolves any network implementation issues. It demonstrates to the customer that the partner will deploy a quality network in an efficient manner and mitigates risk that the incorrect software or hardware is delivered to the installation site.
- C. Staging validates that the system is operational to the customer and provides the customer with increased confidence in the implemented system.
- D. Proper migration allows the customer to adopt the new hardware or software solution without an unacceptable disruption of their network services.

Correct Answer: B

QUESTION 3

Which definition best describes the implementation service component within the implement phase? Select exactly 1 answer(s) from the following:

- A. providing a step-by-step plan that details the installation and service-commission tasks required in order to create a controlled-implementation environment that emulates a customer network
- B. assessing the ability of site facilities to accommodate proposed infrastructure changes
- C. developing and executing proof-of-concept tests, validating high-level infrastructure design, and identifying any design enhancements
- D. installing, configuring, and integrating systems components based on an implementation plan developed in earlier phases

E. improving a customer's infrastructure security system

Correct Answer: D

QUESTION 4

In which of these phases is a customer's network assessed to determine its system readiness? Select exactly 1 answer(s) from the following:

A. Plan

B. Design

C. Operate

D. implement

Correct Answer: A

QUESTION 5

Which benefit can be obtained by using the change management service component in the operate phase?

A. improved system service quality and fewer disruptions

B. greater accuracy, completeness, and timeliness of network configuration information

C. reduced operating costs, due to a consistent framework for making necessary changes in an efficient and accountable manner.

D. Notification provided to interested parties regarding problems that have been identified, and a system that scales with customer requirements.

Correct Answer: C
