QUESTION 1

In which of these phases are a customer's technology strategy requirements identified and documented?

Select exactly 1 answer(s) from the following:

- A. Plan
- B. design
- C. prepare
- D. operate

Correct Answer: C

QUESTION 2

In the implement phase, the ongoing support hand-off meeting provides which of the following benefits?

- A. improves customer satisfaction by ensuring a productive operations environment of systems and processes; and minimizes the time it takes to migrate the customer into an automated and process-oriented environment, realizing productivity benefits from operations resources
- B. provides the customer with necessary reactive break-fix services required for daily operation of the network, the availability of reactive break-fix services being a requirement for customer acceptance of the implementation
- C. establishes both an ongoing review process to ensure that issues are addressed promptly and that the partner can assess and position service activities proactively and a communications mechanism to help the partner maintain awareness of the customer's issues

Correct Answer: B

QUESTION 3

Which benefit can be obtained by using the configuration management service component in the operate phase? Select exactly 1 answer(s) from the following:

- A. reduced operating costs, due to a consistent framework for making necessary changes in an efficient and accountable manner
- B. greater accuracy, completeness, and timeliness of network configuration information
- C. notification provided to interested parties regarding problems that have been identified, and a system that scales with customer requirements
- D. improved system service quality and fewer disruptions

Correct Answer: A

QUESTION 4

Which three high-level design development activities within the prepare phase are performed to create a design that addresses the business and technical needs of the customer? (Choose three.)

- A. analyze business and technology requirements
- B. document and categorize business requirements in terms of performance, availability, capacity, and security
- C. validate the features and functionality of the technology
- D. identify appropriate products, features, and functionalities that address business and technical requirements and goals
- E. produce a documented High-level Design

Correct Answer: ADE

QUESTION 5

Your Certkiller trainee, Certkiller, asks you which of the following best describes customer benefits in delivering network readiness assessment services in the plan phase?

- A. ensures that the customer understands the steps of the implementation
- B. ensures that the eventual design will meet the business and technology requirements originally put forth by the customer
- C. helps achieve business goals by identifying and aligning Advanced Technologies (AT) to business requirements
- D. helps improve Return on Investment (ROI) and speed migration by enabling customer to identify, understand, and plan for necessary infrastructure changes and resource requirements
- E. ensures that the customer has the documentation needed to understand the details of the network that will be used when planning for future changes to the system
- F. helps minimize expensive, time-consuming, network-intrusive redesign by establishing a well- engineered detailed design early in the network lifecycle

Correct Answer: D
