QUESTION 1

In the implement phase, staging involves installation and testing the customer's solution components in a non-production lab environment. Which of the following defines the benefit to the partner?

- A. A properly planned and executed Day 1 support plan improves the customer's and their end-users' satisfaction with the implemented solution.
- B. Staging validates the system and proactively identifies and resolves any network implementation issues. It demonstrates to the customer that the partner will deploy a quality network in an efficient manner and mitigates risk that the incorrect software or hardware is delivered to the installation site.
- C. Staging validates that the system is operational to the customer and provides the customer with increased confidence in the implemented system.
- D. Proper migration allows the customer to adopt the new hardware or software solution without an unacceptable disruption of their network services.

Correct Answer: B

QUESTION 2

What is one key objective of the operations readiness assessment performed in the plan phase? Select exactly 1 answer(s) from the following:

- A. align business requirements with technical requirements.
- B. create a plan to recycle used equipment.
- C. evaluate the readiness of a customer's current operations and network management. infrastructure to support a new technology.
- D. install and test system components in a non-production environment.

Correct Answer: C

QUESTION 3

Which service component within the prepare phase provides a high-level, conceptual architecture of the proposed system that addresses the business requirements of the customer?

- A. High-level Design Development
- B. High-level Proof of Concept
- C. Technology Strategy Development
- D. High-level Technology Strategy
- E. Business Requirements Development

Correct Answer: A

QUESTION 4

Network readiness assessment is an important service component in the plan phase. Which task is part of network readiness assessment?

- A. Conducting a discovery workshop to gather data and initiate network implementation plan development
- B. Assessing current infrastructure and applications and their readiness to support proposed advanced technology system
- C. Documenting network availability and redundancy requirements
- D. Conducting Operations Readiness Assessment
- E. Developing Site Readiness Assessment Report
- F. Accounting for all advanced technology system assets and configurations

Correct Answer: B

QUESTION 5

Which definition best describes the implementation service components within the implement phase?

- A. assessing the ability of site facilities to accommodate proposed infrastructure changes
- B. improving a customer's infrastructure security system
- C. installing, configuring, and integrating systems components based on an implementation plan developed in earlier phases
- D. providing a step-by-step plan that details the installation and service-commission tasks required in order to create a controlled-implementation environment that emulates a customer network
- E. developing and executing proof-of-concept tests, validating high-level infrastructure design, and identifying any design enhancements

Correct Answer: C
