**QUESTION 1**

Your company has a private cloud that is managed by using a System Center 2012 infrastructure.

The network contains an Orchestrator infrastructure and a Service Manager infrastructure.

You need to automate user account provisioning for the Self-Service Portal.

The solution must ensure that new user accounts are approved by a member of the human resources department.

You configure the Orchestrator connector.

Which five actions should you perform next?

(To answer, move the appropriate actions from the list of actions to the answer area.)

Select and Place:

Actions	Answer Area
Create a service offering.	
Create a service request template.	
Configure the Active Directory connector.	
From System Center 2012 Configuration Manager, configure the connector.	
Assign a runbook activity.	
Create a request offering.	
Create an incident request template.	
Create a compliance program activity.	
Create a review activity.	

Correct Answer:

Actions	Answer Area
Create a service offering.	Configure the Active Directory connector.
	Assign a runbook activity.
	Create a review activity.
From System Center 2012 Configuration Manager, configure the connector.	Create a service request template.
	Create an incident request template.
	Create a request offering.
Create a compliance program activity.	

## QUESTION 2

You deploy a System Center 2012 R2 infrastructure that contains Configuration Manager, Orchestrator, Operations Manager, Service Manager, and Virtual Machine Manager (VMM).

Operations Manager is configured to monitor all servers. Configuration Manger is configured to deploy Windows patches to the servers.

You deploy 10 new web servers by using a VMM service template.

You plan to deploy several hundred patches to the servers.

You need to automate the server patching process without generating alerts.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. From VMM, create an update baseline and configure the scope of the update baseline.
- B. From Orchestrator, create a scheduled runbook that contains an activity to deploy the updates and to set the maintenance mode.
- C. From Configuration Manager, create a software update deployment. From Operations Manager, set the servers to maintenance mode.
- D. From Configuration Manager, create an automatic deployment rule.

Correct Answer: B

## QUESTION 3

You need to recommend an automated solution to resolve the ticket generation issue.

What should you include in the recommendation?

- A. From Operations Manager, create diagnostic tasks. From Orchestrator, create runbooks that forward alerts to the help desk application.
- B. From Service Manager, create a connector. From Operations Manager, configure the connector.
- C. From Service Manager, create a connector. From Orchestrator, configure connectors.
- D. From Operations Manager, create diagnostic tasks. From Orchestrator, configure connectors.

Correct Answer: B

#### QUESTION 4

You need to recommend a solution to ensure that price sheets can be created and published after NWT-SCOM01 and NWT-SCSM01 are deployed and NWTVMM01

is upgraded.

On which server should you recommend performing each action? To answer, drag the appropriate servers to the correct actions. Each server may be used once, more than once, or not at all. You may need to drag the split bar between panes

or scroll to view content.

Select and Place:

Servers	Answer Area
NWT-SCOM01	Install chargeback reports. Server
NWT-SCSM01	Install chargeback report dependencies. Server
NWT-VMM01	Create an Operations Manager connection. Server
	Create an Operations Manager configuration item (CI) connector. Server

Correct Answer:

Servers	Answer Area
NWT-SCOM01	Install chargeback reports. NWT-SCOM01
NWT-SCSM01	Install chargeback report dependencies. NWT-SCOM01
NWT-VMM01	Create an Operations Manager connection. NWT-VMM01
	Create an Operations Manager configuration item (CI) connector. NWT-SCSM01

**QUESTION 5**

You are preparing a virtual machine that will be used as a template.

You need to install SQL Server 2008 R2 on the virtual machine. The solution must meet the technical requirement for creating virtual machines. Which SQL Server 2008 R2 installation option should you select?

- A. Install based on configuration file
- B. Image completion of a prepared stand-alone instance of SQL Server
- C. Image preparation of a stand-alone instance of SQL Server
- D. Advanced cluster preparation

Correct Answer: C
