QUESTION 1

You need to recommend a solution for the application servers. The solution must meet the technical requirements. What should you create?

- A. A protection group that contains all of the application servers
- B. A protection group that contains all of the Hyper-V hosts
- C. A separate protection group for each application owner
- D. A separate protection group for each application server

Correct Answer: D

QUESTION 2

You need to install the new version of App1.

What should you do first? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. Add the new version of App1 to a copy of the existing service template.
- B. From Configuration Manager, create a new deployment type for the new version of App1.
- C. Add the new version of App1 to a new blank service template.
- D. From a Group Policy, deploy the new version of App1.

Correct Answer: A

QUESTION 3

You need to recommend which System Center 2012 component must be added to the System Center infrastructure to meet the technical requirement for the Configuration Manager service.

The solution must minimize administrative effort.

Which component should you recommend?

- A. App Controller
- B. Microsoft System Center Advisor (SCA)
- C. Service Manager
- D. Orchestrator

Correct Answer: C

QUESTION 4

Your company has a private cloud that contains a System Center 2012 R2 infrastructure. You have a management server named Server1 that has Operations Manager installed. You have a management server named Server2 that has Virtual Machine Manager (VMM) installed.

You need to monitor network devices by using Operations Manager.

The solution must meet the following requirements:

Only provide the health status of devices located on physical networks.

Only include devices that are one hop away from a managed host. Only include devices that are part of the private cloud.

What should you use?

- A. The Fabric Health Dashboard
- B. The Microsoft System Center Advisor (SCA)
- C. The Network Vicinity Dashboard
- D. The Application Summary Dashboard

Correct Answer: A

QUESTION 5

Your company has a private cloud that contains a System Center 2012 Service Manager infrastructure.

You need to create a service level objective (SLO) for incidents that have a priority value of 1.

What should you create first?

- A. A rule
- B. A service template
- C. A queue
- D. A channel

Correct Answer: C

Queues are used in SCSM 2012 SLA Management to apply the SLA to a group of work items.
