QUESTION 1

Your company has a private cloud managed by a System Center 2012 Virtual Machine Manager (VMM) infrastructure.

The server fabric contains three servers named Host1, Host2, and Host3. The servers are configured as shown on the following table.

Server name	Server role	Host group	Connection
Host1	Hyper-V host VMM library	HG1	Fibre Channel
Host2	VMM library	HG2	iSCSI
Host3	Hyper-V host	HG3	Fibre Channel

The networking fabric contains a SAN named STORAGE1. STORAGE1 supports cloning.

You create a SAN copy-capable template named Template1 for a new virtual machine.

Template1 uses a VHD stored on Host2.

You need to ensure that Template1 can be used to provision virtual machines on Host1 and Host3. The solution must use the minimum amount of administrative effort and must use SAN cloning.

What should you do? (Each correct answer presents part of the solution. Choose two.)

- A. Move Template1 to Host1.
- B. Move Template1 to Host3.
- C. Add Host1 to HG2.
- D. Configure Host2 to use Fibre Channel connection.
- E. Configure Host3 to use an iSCSI connection.
- F. Add Host3 to HG1.

Correct Answer: AF

Put the template on the Library server (host 1).

Add the second host (host3) to the Host group on the library server (host1).

QUESTION 2

You need to configure VMM to meet the storage requirements after the planned upgrade of VMM to System Center 2012 R2. What should you add?

- A. Storage providers and storage devices
- B. Logical units and logical switches
- C. Storage providers and logical units
- D. Logical switches and virtual hard disks (VHDs)

Correct Answer: C

QUESTION 3

Your company has a datacenter in Los Angeles.

The datacenter contains a System Center 2012 infrastructure that contains the following roles:

Orchestrator

Service Manager

Virtual Machine Manager(VMM)

The company is evaluating an auditing policy.

You need to recommend a portal that must be used to ensure that the following tasks are audited:

When an administrator updates a service

When a user requests a change to a service

When an administrator approves a change to a service

You need to recommend a solution that meets the requirements of the compliance policy.

Which portal should you include in the recommendation?

- A. The Service Manager Self-Service Portal
- B. The Virtual Machine Manager Self-Service Portal (VMMSSP) 2.0
- C. The Virtual Machine Manager Self-Service Portal (VMMSSP)
- D. The App Controller portal

Correct Answer: A

QUESTION 4

You need to identify which MAC address pool must be used to meet the requirements for the private cloud infrastructure.

How should you configure the address pool for the private cloud? (To answer, drag the appropriate MAC addresses to the correct location. Each MAC address may be used once, more than once, or not at all. You may need to drag the split

bar between panes or scroll to view content.)

Select and Place:

MAC Adresses	Answer Area
00-00-00-15-00-00	Starting MAC address: <input type="text" value="MAC address"/>
00-15-00-00-00-00	Ending MAC address: <input type="text" value="MAC address"/>
00-15-00-30-00-00	
00-15-30-00-00-00	
00-16-00-00-00-00	

Correct Answer:

MAC Adresses	Answer Area
00-00-00-15-00-00	Starting MAC address: <input type="text" value="00-15-00-00-00-00"/>
	Ending MAC address: <input type="text" value="00-15-00-30-00-00"/>
00-15-30-00-00-00	
00-16-00-00-00-00	

The first three octets of the beginning and ending MAC address must be the same.

QUESTION 5

After the planned implementation of System Center 2012 R2, you need to configure the integration with Windows Azure.

What should you do? To answer, drag the appropriate actions to the correct components. Each action may be used

once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Actions	Answer Area
Add a subscription.	<div>App Controller portal: <input type="text" value="Action"/></div> <div>Virtual Machine Manager console: <input type="text" value="Action"/></div>
Add a service template.	
Configure a virtual machine path.	
Configure a stored virtual machine path.	

Correct Answer:

Actions	Answer Area
	<div>App Controller portal: <input type="text" value="Add a subscription."/></div> <div>Virtual Machine Manager console: <input type="text" value="Configure a stored virtual machine path."/></div>
Add a service template.	
Configure a virtual machine path.
