Following Questions and Answers are all new published by Microsoft Official Exam Center

QUESTION 1

You need to recommend changes to Server9 before you upgrade to VMM 2012. What should you include in the recommendation?

A. Upgrade Server9 to Windows Server 2012.

B. Install the Windows Assessment and Deployment Kit (Windows ADK).

C. Install Microsoft .NET Framework 4.

D. Install SQL Server 2008 R2 Service Pack 1 (SP1) Standard on Server9.

Correct Answer: D

QUESTION 2

You are planning the deployment of Operations Manager. Operations Manager will be deployed before DPM. You plan to put the operational database on SQL03.

You need to identify which SQL Server servers must be used for the Operations Manager deployment.

Which server should host each database component for the Operations Manager deployment? To answer, drag the appropriate servers to the correct components. Each server may be used once, more than once, or not at all. You may need

to drag the split bar between panes or scroll to view content.

Select and Place:

Correct Answer:

Servers	Answer Area
SQL03	Data warehouse database: SQL04
SQL04	
SQL05	Report server: SQL04

QUESTION 3

You have a System Center 2012 Service Manager infrastructure that contains a single server named SCSM1.

You plan to use a new account named Account1 as the Operational Database Account.

You plan to configure SCSM1 to use Account1 as the logon account for the System Center Data Access Service.

You need to identify which roles must be assigned to Account1.

Which two roles should you identify? (Each correct answer presents part of the solution. Choose two.)

A. the Service Manager Administrators User Role Profile

B. the Microsoft SQL Server db_ddladmin fixed database role

C. the Service Manager Workflows User Role Profile

D. the Service Manager Advanced Operators User Role Profile

E. the Microsoft SQL Server configsvc_users database role

F. the Microsoft SQL Server sdk_users database role

Correct Answer: AF

http://technet.microsoft.com/en-us/library/hh495527.aspx suggests that A, E and F are required (Service Manager Administrators User Role Profile, configsvc_users database role and sdk_users database role) but the question is asking for

just two answers.

http://technet.microsoft.com/en-us/library/hh495527.aspx doesn\\'t mention the configsvc_users database role as below so the answer is A and F.

System Center Configuration service and System Center Data Access service account:

This account is one set of credentials that is used to update and read information in the operational database. Operations Manager ensures that the credentials used for the System Center Data Access service and System Center

Configuration service account are assigned to the sdk_user role in the operational database.

QUESTION 4

You have a System Center 2012 Virtual Machine Manager (VMM) infrastructure.

You plan to create profiles.

You need to identify which settings can be applied to each profile type.

Which settings should you identify?

To answer, drag the appropriate setting or settings to the correct profile type or profile types in the answer area. (Each setting may be used once, more than once, or not at all.)

Select and Place:

Configurations	Answer Area			
	Application Profile	Guest OS Profile	Hardware Profile	Host Profile
Number of processors	Configuration	Configuration	Configuration	Configuration
OS compatibility				
Product key				

Correct Answer:

Configurations	Answer Area			
	Application Profile	Guest OS Profile	Hardware Profile	Host Profile
Number of processors	OS compatibility	Product key	Number of processors	Product key
OS compatibility				
Product key				

QUESTION 5

You have a deployment of System Center 2012 R2 Virtual Machine Manager (VMM).

You plan to use the Create Clustered File Server Wizard to create a cluster on two physical servers named Server1 and Server2. The new cluster will be named Cluster1 and will have a virtual IP (VIP) of 10.20.30.13.

When you attempt to deploy the new cluster, you receive the following error message in the job window: "Error (26568) The IP address 10.20.30.13 could not be allocated from any IP address pool."

You need to ensure that you can deploy the cluster.

What should you do?

A. Create a new logical network IP pool and add the IP address to the new pool.

B. Create a new VIP template profile.

C. Add the IP address to the VIP section of the logical network IP pool.

D. Create a DHCP reservation for the IP address.

Correct Answer: A
