QUESTION 1

You are creating tags to identify content in a site collection. You have the following requirements when tagging content:

Correct Answer: A

QUESTION 2

HOTSPOT

You manage a SharePoint farm in an Active Directory Domain Services (AD DS) forest, You implement SharePoint Online. You plan to create a result source in SharePoint Online Services to return search results from an on-premises SharePoint farm.

You have the following requirements:

- Users must be able to search on-premises content by using the URL <https://spexternal.adventureworks.com>.
- Users must be able to search SharePoint Online resources by using the URL <https://adventureworks.sharepoint.com>
- Users must not be required to authenticate each time that they access SharePoint Online.
- Searches from the SharePoint Online enterprise search center must display results from the on-premises SharePoint environment and SharePoint Online.

You need to create the result source.

Hot Area:

Parameter	Value
URL	<input type="text" value="https://spexternal.adventureworks.com"/> <input type="text" value="https://adventurewrks.sharepoint.com"/>
Protocol	<input type="text" value="OpenSearch 1.0/1.1"/> <input type="text" value="Remote SharePoint"/>
Authentication	<input type="text" value="single sign-on ID"/> <input type="text" value="default authentication"/>

Correct Answer:

Parameter	Value
URL	https://spexternal.adventureworks.com https://adventurewrks.sharepoint.com
Protocol	OpenSearch 1.0/1.1 Remote SharePoint
Authentication	single sign-on ID default authentication

QUESTION 3

You need to configure permissions for App1 administrators. What should you do?

- A. Add the adatum.com SharePoint administrators as site collection administrators.
- B. Add the fabrikam.com SharePoint administrators to the SharePoint_Shell_Access role.
- C. Add the fabrikam.com SharePoint administrators as site collection administrators.
- D. Add the adatum.com SharePoint administrators to the SharePoint_Shell_Access role.

Correct Answer: B

SharePoint administrators in the fabrikam.com domain must be able to administer App1 by using Windows PowerShell.

QUESTION 4

A company is planning to deploy My Sites to its 25,000 employees. The company will maintain dedicated content databases for the storage of personal site collections.

You need to create the minimum number of content databases required to support the My Sites.

What should you do?

- A. Create three content databases. Set the value of the WarningSiteCount property of each content database to 10,000.
- B. Create one content database. Set the value of the WarningSiteCount property of the content database to 25,000.
- C. Create one content database. Set the value of the MaxSiteCount property of the content database to 25,000.
- D. Create three content databases. Set the value of the MaxSiteCount property of each content database to 10,000.
- E. Create five content databases. Set the value of the WarningSiteCount property of each content database to 5,000.
- F. Create five content databases. Set the value of the MaxSiteCount property of each content database to 5,000.

Correct Answer: D

QUESTION 5

You have a SharePoint farm.

You need to configure Active Directory Federation Services (AD FS).

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct.

Select and Place:

Actiors

- Configure AD FS with the web application as a relying party.
- Configure web applications to use daims-based authentication that use AD FS as the trusted identity provider.
- Configure SharePoin: 2013 to trust AD FS as a relying party.
- Configure AD FS with the web application as an identity provider.
- Configure SharePoint: 2013 to trust AD FS as an identity provider.

Answer Area

- Configure AD FS with the web application as a relying party.
- Configure SharePoint: 2013 to trust AD FS as an identity provider.
- Configure web applications to use daims based authentication that use AD FS as the trusted identity provider.

Correct Answer:

Actiors

-
-
- Configure SharePoint: 2013 to trust AD FS as a relying party.
- Configure AD FS with the web application as an identity provider.
-

Answer Area

- Configure AD FS with the web application as a relying party.
- Configure SharePoint: 2013 to trust AD FS as an identity provider.
- Configure web applications to use daims based authentication that use AD FS as the trusted identity provider.

Phase 0: Install and configure an AD FS server (we can assume that this has already been done here). Phase 1:

Configure AD FS with the web application as a relying party Phase 2: Configure SharePoint 2013 to trust AD FS as an identity provider Phase 3: Configure web applications to use claims-based authentication and AD FS as the trusted identity provider

Incorrect answers:

* the web application is they relying party, not ADFS

* We should not configure SharePoint to trust AD FS as an identity provider, instead the web applications should trust AD FS as an identity provider.

Reference: Configure SAML-based claims authentication with AD FS in SharePoint 2013
