Answer Area

Monitor how full the cache is	
Monitor the removal of cache contents	

Correct Answer:

Answer Area	
Purpose	Performance Monitor counter
Monitor how full the cache is	Blob Cache fill ratio
Monitor the removal of cache contents	Total number of cache compactions

Blob cache flushes/second
Disk Cache fill ratio
Total objects in Blob Cache

Note:

* From scenario:

Scanned contracts are stored in binary large object (BLOB) cache storage. The BLOB cache is routinely filling up. End users are reporting poor performance when

viewing scanned contracts.

* Symptoms: The Blob Cache fill ratio performance counter threshold has been exceeded. Cause: The configured size for the disk-based cache is smaller than the

total size of frequently accessed files for the Web application.

* Total Number of cache Compactions:

If this number is continually or frequently high, the cache size is too small for the data being requested. To improve performance, increase the size of the cache.
