QUESTION 1

You are implementing a claims-based authentication solution for a SharePoint farm in an Active Directory Domain Services domain. You install and configure Active Directory Federation Services (AD FS).

You need to ensure that all web applications in the farm support SAML-based claims authentication.

What should you do? (Each correct answer presents part of the solution. Choose all that apply.)

- A. Configure AD FS with the web application as a relying party.
- B. Configure web applications to use forms-based authentication and AD FS as the trusted identity provider.
- C. Configure web applications to use claims-based authentication and AD FS as the trusted identity provider.
- D. Configure web applications to use classic mode authentication and AD FS as the trusted identity provider.
- E. Configure SharePoint to trust AD FS as an identity provider.

Correct Answer: ACE

QUESTION 2

An organization is using SharePoint for team collaboration. Each department in the organization has a team site and a site owner who is responsible for site management.

Site owners do not have administrative rights to the web servers.

You need to ensure that site owners can install trusted apps to their own sites.

What should you do?

- A. Create a sandbox solution.
- B. Grant the site owners the Full Control permission level to the web applications.
- C. Configure solution blocking settings.
- D. Configure content deployment settings.
- E. Create an App Catalog site.

Correct Answer: E

QUESTION 3

You need to back up the HR site collection.

What should you do? (To answer, select the appropriate option from each drop-down list in the answer area.)

•Grant the SharePoint Backup service account and the

service account read and write access to the backup directory.

•Configure a to back up the site collection by running the Windows PowerShell cmdlet

.

Hot Area:

•Grant the SharePoint Backup service account and the

service account read and write access to the

SharePoint Server	
SQL Server	

 backup directory.

•Configure a to back up the site collection

SharePoint farm account	
Windows scheduled task	

by running the Windows PowerShell cmdlet

Backup-SPFarm	
Backup-SPSite	

weekly	
daily	

.

Correct Answer:

•Grant the SharePoint Backup service account and the

service account read and write access to the

SharePoint Server	<input type="checkbox"/>
SQL Server	<input checked="" type="checkbox"/>

backup directory.

•Configure a to back up the site collection

SharePoint farm account	<input type="checkbox"/>
Windows scheduled task	<input checked="" type="checkbox"/>

by running the Windows PowerShell cmdlet

weekly	<input type="checkbox"/>
daily	<input checked="" type="checkbox"/>

Backup-SPFarm	<input type="checkbox"/>
Backup-SPSite	<input checked="" type="checkbox"/>

QUESTION 4

You are configuring the ProseWeb site.

You need to create the root site collection on the web application.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Answer Area	
<p>Upload the solution package to the Solutions gallery of the ProseWeb site collection, and activate the solution.</p>	
<p>Run the Install-SPSolution Windows PowerShell cmdlet.</p>	
<p>Start the Microsoft SharePoint Foundation Sandboxed Code Service on at least one server in the farm from Central Administration.</p>	
<p>Run the Add-SPSolution Windows PowerShell cmdlet.</p>	
<p>In Central Administration, create a new site collection based on the custom ProseWeb template.</p>	

Correct Answer:

Answer Area	
Upload the solution package to the Solutions gallery of the ProseWeb site collection, and activate the solution.	Run the Add-SPSolution Windows PowerShell cmdlet.
	Run the Install-SPSolution Windows PowerShell cmdlet.
Start the Microsoft SharePoint Foundation Sandboxed Code Service on at least one server in the farm from Central Administration.	In Central Administration, create a new site collection based on the custom ProseWeb template.

QUESTION 5

You are planning to install an instance of Microsoft SQL Server for a SharePoint 2013 farm.

You have the following requirements:

Ensure that databases can be redirected to other servers.

Minimize potential security threats.

You need to install and configure the instance.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Create a SQL Server alias and configure the farm to use the alias.	
Create a default instance of SQL Server.	
Create a named instance of SQL Server.	
Configure the instance to use a standard port.	
Configure the instance to use a custom port.	

Correct Answer:

	Answer Area
	Create a named instance of SQL Server.
Create a default instance of SQL Server.	Configure the instance to use a custom port.
	Create a SQL Server alias and configure the farm to use the alias.
Configure the instance to use a standard port.
